General

- 1.1 The Mission
- 1.2 The Objectives of BEE and its Role
- 1.3 Report of the Director General
- 1.4 Energy Use Trends
- 1.5 Schemes of Bureau of Energy Efficiency
- 1.6 National Energy Conservation Award and Painting Competition
- 1.7 Governing Council Composition

1.1 The Mission

The mission of the Bureau of Energy Efficiency is to develop policy and strategies with a thrust on self-regulation and market principles, within the overall framework of the Energy Conservation Act, 2001 with the primary objective of reducing energy intensity of the Indian economy. This will be achieved with active participation of all stake holders, resulting in accelerated and sustained adoption of energy efficiency in all sectors of the economy.

1.2 The Objectives of BEE and its Role

Objectives of BEE

- To provide policy framework and direction to national energy conservation activities.
- To establish systems and procedures to measure monitor and verify energy efficiency improvements, in individual sectors as well as at the National level.
- To leverage multi-lateral, bi-lateral and private sector support in implementations of programs and projects on efficient use of energy and its conservation.
- To coordinate policies and programs on efficient use of energy and its conservation with the involvement of stakeholders.
- To plan, manage and implement energy conservation programs as envisaged in the Energy Conservation Act.
- To demonstrate energy efficiency delivery mechanism as, envisaged in the Energy Conservation Act, through private- public partnership.

Role of BEE

BEE coordinates with designated agencies, designated consumers and other organizations working in the field of energy conservation/efficiency, recognize and utilize the existing resources and infrastructure in performing the functions assigned to the Bureau by and under the Energy Conservation Act.

The Act provides regulatory mandate for standards & labeling of equipment and appliances; energy conservation building codes for commercial buildings; and energy consumption norms for energy intensive industries. The EC Act was amended in 2010 and the main amendments of the Act are given below:

- The Central Government may issue the energy savings certificate to the designated consumer whose energy consumption is less than the prescribed norms and standards in accordance with the procedure as may be prescribed.
- The designated consumer whose energy consumption is more than the prescribed norms and standards shall be entitled to purchase the energy savings certificate to comply with the prescribed norms and standards

- The Central Government may, in consultation with the Bureau, prescribe the value of per metric ton of oil equivalent of energy consumed
- Commercial buildings which are having a connected load of 100 kW or contract demand of 120 kVA and above shall come under the purview of ECBC under EC Act.

Promotional Role

The major Promotional Role of BEE include:

- Creating awareness and disseminating information on energy efficiency and conservation.
- Arranging and organizing training of personnel and specialists for efficient use of energy and its conservation.
- Strengthening consultancy services in the field of energy conservation
- Promoting research and development.
- Developing testing and certification procedures and promoting testing facilities.
- Formulating and facilitating implementations of pilot projects and demonstration projects.
- Promoting use of energy efficient processes, equipment, devices and systems.
- Take steps to encourage preferential treatment for use of energy efficient equipments or appliances.
- Promoting innovative financing of energy efficiency projects.
- Providing financial assistance to institutions for promoting efficient use of energy and its conservation.
- Preparing educational curriculum on efficient use of energy and its conservation
- Implement international co-operation programs relating to efficient use of energy and its conservation.

1.3 Report of the Director General

A host of steps have been aggressively initiated to achieve efficient use of energy so that while the consumption requirements increase in coming years, our aggregate demand continues to reflect commitment to clean energy sources. India has assumed leadership role in addressing global issue of climate change by committing itself to reduce the emission intensity of its GDP by 33 to 35% from 2005 level. To supplement the commitment, Hon'ble Prime Minister had constituted a Group of Secretaries on Energy Efficiency and Conservation.

Energy efficiency schemes implemented by the Bureau of Energy Efficiency under the Ministry of Power covers major areas such as Standards and Labeling programme for appliances and equipment, Perform, Achieve and Trade (PAT) under National Mission for Enhanced Energy Efficiency (NMEEE), Demand Side Management initiatives in Agriculture, Municipalities and Buildings. Various demand side management efforts have brought down the annual increase in energy generation from around 9% to 6%.

Under the S&L programme for appliances and equipments two new appliances i.e. Inverter AC and LED Lamps have been brought under the purview of mandatory regime. For Colour TV and Room Air conditioner existing standards have been upgraded and draft standard for centralized HVAC (chiller) has been established. Continuing the effort to expand the coverage of the programme to more appliances, assessment study for 24 new appliances has been initiated. The institutional framework for enforcement through capacity building of retailers, testing laboratories have been strengthened.

One of the major achievement was the launch of the new version of Energy Conservation Building Code (ECBC) and till date, 11 States and 1 UT have notified the ECBC. To cater to the growing demand of improving efficiency in the residential sector, ECO NIWAS portal was launched by Hon'ble President of India on the National Energy Conservation Day which is an interactive tool to benefit construction of energy efficient homes. All rules and regulations to facilitate implementation of ECBC have been notified and MOU signed with Council of Architecture to build the capacities of architects on ECBC and to incorporate features of ECBC in the curricula.

Under industrial programme of Perform, Achieve and Trade (PAT) two new sectors namely Petrochemicals and Hotel under commercial building have been introduced. With these, the present coverage under PAT is almost 65% of the total industrial energy consumption. This year, the PAT IV cycle have been introduced and the programme now covers 13 sectors and 846 energy intensive industries. One of the major achievements under programme has been the launch of ESCerts portal which has resulted in trading of ESCerts through power exchanges. Total volume of ESCerts traded was about 13 lakhs which resulted into business worth INR 100 crores.

This year the National Summit on energy efficiency in Small and Medium Enterprises (SMEs) was organized and 9 Energy Management cells have been established under the SME programme of BEE. BEE has continued its efforts towards capacity development of key stakeholders like Financial Institutions, Energy Service Companies, Distribution Companies, State Designated Agencies and others. This year the National Energy Conservation day was celebrated in the august presence of Hon'ble President of India. The National Painting Competition saw participation of 1.24 crores children.

BEE has launched an extensive awareness campaign through electronic, outdoor and print media to promote the message of Energy conservation amongst the masses. BEE has also aimed global recognition for its efforts through strengthening of bilateral and multilateral cooperation.

1.4 Energy Use Trends

Energy consumption in India is characterized by low per capita level with a large disparity between urban and rural areas. In 2015-16, our per capita energy and electricity consumption at 670 kgoe and at 1075 kWh/year, respectively, are just one-third of the world average.

The sectoral energy consumption in India as per CEA Annual Report 2016 has been highlighted below:

The Energy Intensity (at 2004-05 prices) decreased from 0.465 Mega Joules per rupee in 2006-07 to 0.284 Mega Joules per rupee in 2014-15 which further decreased to 0.271 Mega Joules in 2015-16. (Source: National Electricity Plan) Energy intensity has decreased over the last decade. This decline may be attributed to faster growth of GDP than energy demand, the services sector having a growing share of the economy, and the success of energy efficiency programmes etc.

1.5 Schemes of Bureau of Energy Efficiency

Institutional mechanism

- Strengthening of State Designated Agency
- Contribution to State Energy Conservation Fund

Awareness

- Energy conservation awards
- Painting competition

Buildings EE

- Energy Conservation Building Codes
- Retrofit in Old Buildings
- Residential Building Guidelines

Star Rating of Appliances

- 10 Mandatory Labelled Appliances
- 11 Voluntary Labelled Appliances

National Mission for Enhanced Energy Efficiency

- Perform, Achieve & Trade (PAT)
- Market Transformation for Energy Efficiency (MTEE)
- Framework for Energy Efficient Economic Development (FEEED)
- Energy Efficiency Financing Platform (EEFP)

Demand Side Management

- Agriculture DSM
- Municipal DSM
- Energy Efficiency in SMEs
- Capacity building of DISCOMs

1.5.1 National Mission for Enhanced Energy Efficiency (NMEEE)

The National Action Plan on Climate Change (NAPCC) was released in June 2008 by the Government of India outlining eight National Missions for achieving key goals in context of climate change. National Mission for Enhanced Energy Efficiency (NMEEE) is one of the eight National Missions under the NAPCC. Strengthening of energy efficiency market through implementation of state-of-the-art initiatives is the basic aim of NMEEE mission. The thrust of the NMEEE for promoting energy efficiency is on self regulation and market principles by putting in place the following four initiatives:

1. **Perform, Achieve and Trade (PAT) scheme** - aimed at reduction of Specific Energy Consumption (SEC) in energy intensive sectors.
2. **Market Transformation for Energy Efficiency (MTEE)** - aiming at transformation of market towards the use of energy efficient appliances
3. **Energy Efficiency Financing Platform (EEFP)** - for providing a platform for capacity building of financial institutions and other stakeholders
4. **Framework for Energy Efficient Economic Development (FEEED)** - developing fiscal instruments to leverage finance for financing Energy Efficiency (EE) projects.

The status of four initiatives of NMEEE is as follows:-

(i) Perform Achieve and Trade Scheme (PAT)

The implementation of PAT in its first cycle (2012-15) in large industries has led to energy saving of 8.67 MTOE by year 2014-15, which is about 1.25% of total primary energy supply to the country. This energy saving also translates in to avoiding of about 31 million tonne of CO₂ emission. This energy saving has been converted to tradeable instrument called Energy Saving Certificates (ESCerts). Ministry of Power had issued about 38.25 lakh ESCerts to 306 Designated Consumers (DCs) for excess energy saving and 110 DCs have been entitled to purchase about 14.25 lakh ESCerts to meet the shortfall to meet energy saving targets. Trading of ESCerts at Power Exchange had commenced from 26th September, 2017. The total volume of ESCerts traded is about 12.98 lakhs resulting into a business of about INR 99.82 crores during 17 weekly sessions.

The second cycle of PAT (2016-19) was notified in March, 2016 covering 621 DCs from 11 sectors which include eight existing sectors and three new sectors viz. Railways, Refineries and DISCOMs. PAT in its second cycle seeks to achieve an overall energy saving target of 8.869 MTOE.

On the recommendations of the Parliamentary Standing Committee on Energy, Executive Committee on Climate Change under Prime Minister's Office (PMO) and Group of Secretaries for Energy Efficiency and Energy Conservation to accelerate coverage of DCs under PAT, the scheme is being implemented on a rolling cycle basis where new DCs/sectors are included every year. Subsequently, PAT cycle -III (2017-20) commenced from 1st April, 2017. PAT scheme in its third cycle seeks to achieve an overall energy saving target of 1.06 MTOE for which SEC reduction targets have been assigned to 116 DCs from six energy intensive sectors.

PAT cycle-IV (2018-21) has commenced with effect from 1st April 2018 in which 109 Designated Consumers have been notified from the existing sectors and two new sectors i.e. Petrochemicals and Commercial Buildings (Hotels).

PAT BUILDINGS - HOTELS

There are various energy intensive sectors which need to be kept under vision, other than industrial sectors which are generally classified as energy intensive. Hotels under the services sector are one of them, they are consuming considerable amount of energy on the basis of the luxurious, glamorous, pleasant and lucrative services. BEE has recently notified DCs under PAT BUILDING - HOTELS sector. Any hotel having energy consumption more than 1000 TOE (Tons of oil equivalent) is considered as a Designated Consumer. 37 Designated Consumers were identified under this category and their targets notified in March, 2018. These targets need to be achieved by 2021

and on the basis of their achievement they will be either given Escerts or they need to purchase Escerts or pay penalty, on the lines of industries as per PAT Scheme.

(ii) Market Transformation for Energy Efficiency (MTEE)

This initiative under the Mission aims to accelerate the shift to energy efficient appliances in designated sectors through innovative measures to make the products more affordable. Under MTEE two programmes were introduced for the promotion of energy efficient products in the market viz. Bachat Lamp Yojna (BLY) and Super-Efficient Equipment Programme (SEEP).

- The Bachat Lamp Yojana (BLY) was developed for the replacement of inefficient bulbs with Compact Fluorescent Lamps (CFLs). Presently BLY program involves support to LED deployment under UJALA by providing technical assistance to partner agencies such as EESL and REC.
- Super-Efficient Equipment Programme (SEEP) is a program designed to bring market transformation for super-efficient appliances by providing financial stimulus innovatively at critical point/s of intervention. Under this program, ceiling fan has been identified and adopted as the first appliance.

(iii) Energy Efficiency Financing Platform (EEFP)

Energy Efficiency Financing Platform (EEFP) was launched as one of the initiatives under NMEEE to provide a platform to interact with Financial Institutions (FIs) and project developers for implementation of energy efficiency projects. Under this programme, MoUs have been signed by BEE with M/s. PTC India Ltd, M/s. SIDBI, HSBC Bank, Tata Capital and IFCI Ltd to promote financing for energy efficiency projects.

For capacity building of FIs, BEE signed MoU with Indian Banks' Association for the Training Programme on Energy Efficiency Financing. In Phase 1, BEE had successfully completed 4 Training of Trainers (ToT) workshops under this Training Programme for financial institutions on EE financing. Presently, Bureau of Energy Efficiency has launched Phase 2 of these training workshops. Till date, nine workshops have been conducted at Mumbai, Thane, Pune, Bengaluru, Mangalore, New Delhi, Jaipur, Bhubaneswar and Ahmedabad, and more than 380 officials from different banks, NBFCs and institutes have been trained under this training programme.

Publications:

1. Training Manual for Energy Efficiency Financing in India
2. Success stories for Energy Efficiency Projects Financed in India
3. Market Assessment for Partial Risk Guarantee Fund for Energy Efficiency and Venture Capital Fund for Energy Efficiency.

4. Guidelines for Financing Energy Efficiency Projects in India

(iv) **Framework for Energy Efficient Economic Development (FEEED)**

FEEED focuses on developing appropriate fiscal instruments to promote energy efficiency financing. In this context, two programmes have been commenced i.e. Partial Risk Guarantee Fund for Energy Efficiency (PRGFEE) and Venture Capital Fund for Energy Efficiency (VCFEE).

a) **Partial Risk Guarantee Fund for Energy Efficiency (PRGFEE)**

Under NMEEE, BEE has institutionalized PRGFEE for addressing the debt related issues in financing EE projects. PRGFEE is a risk sharing mechanism to provide Participating Financial Institutions (PFIs) with a partial coverage of risk involved in extending loans for EE projects. PRGFEE guarantees 50% of loan amount or Rs. 10 crore per project, whichever is less. PRGFEE support has been provided to government buildings, private buildings (commercial or multi-storey residential buildings), municipalities, SMEs and industries. This guarantee is extended to financial institutions which will extend loans to ESCOs for implementing EE projects.

Status of Implementation / Activities of PRGFEE:

- i. Under PRGFEE, MoP has constituted Supervisory committee for monitoring the implementation of PRGFEE.
- ii. BEE has appointed a consortium of RECPDCL-REC-EESL as Implementing Agency (IA) for operationalization of PRGFEE in July 2015.
- iii. Operations Manual for PRGFEE has already been approved.
- iv. PRGFEE Rules have been notified in May 2016.
- v. Four FIs have been empanelled under PRGFEE which are Andhra Bank, Yes Bank, Tata Cleantech Capital Ltd. and IDFC Bank.

b) **Venture Capital Fund for Energy Efficiency (VCFEE)**

BEE has institutionalized Venture Capital Fund for Energy Efficiency (VCFEE) to encourage equity investment in EE projects in India. Venture Capital Fund for Energy Efficiency is a fund to provide equity capital for energy efficiency projects. The Fund shall provide last mile equity support to specific energy efficiency projects, limited to a maximum of 15% of total equity required, through Special Purpose Vehicles or Rs. 2 crore, whichever is less. The support has been provided to only government buildings, private buildings (commercial or multi-storey residential buildings) and municipalities.

Status of the Implementation of VCFEE:

- i. The VCFEE has been constituted under the provisions of Indian Trust Act 1882. The trust deed was registered with jurisdictional sub-registrar Government of Delhi.
- ii. Board of Trustees for VCFEE has been constituted.
- iii. VCFEE Rules have been notified on 31st March 2017.

1.5.2 Energy Efficiency in Buildings

1.5.2.1 Energy Efficiency in commercial buildings.

Commercial building sector in India is expanding rapidly at over 9% per year spurred largely by the strong growth in the services sector. It has been estimated that at least 60% of building stock that will exist in the year 2030 is yet to come up in the country - a situation that is fundamentally different from developed countries. Having regard to the fact that the rate of growth in commercial building sector is amongst the highest, and that this sector needs to be moderated in its energy consumption. BEE introduced the Energy Conservation Building Code (ECBC) in 2007 to reduce the adverse impact of buildings on the environment. ECBC defines norms of energy performance for various building components, and takes into consideration, the climatic region. The application of these norms lowers the building's energy requirement without affecting the function, comfort, health or productivity of the occupants.

BEE has launched new version of code ECBC 2017 in June 2017. The newly developed code is futuristic, pragmatic and easy to implement. The new version has three levels of compliance: ECBC, ECBC+, and Super ECBC. These additions are geared to encourage public and private sectors to not only meet the basic ECBC criteria, but to exceed them as well. Although the code was developed at Central level, its enforcement lies with the State Government. As per EC Act 2001, the State Government has been given power to notify the code as per their regional/local requirements. Long-term success of the ECBC will depend heavily on the collaborative roles various stakeholders would play towards the development, adoption and implementation of building code. Barriers and challenges for implementation of ECBC vary in terms of technical and design aspects, market barriers, policy and enforcement issues.

The emphasis has been on developing standardized enforcement model for uniform implementation throughout the country. The highlights of activities during 2017-18 are as follows:

- **Regulatory framework for ECBC enforcement:**
 - o To support the enforcement of the code, Energy Conservation Building Code Rules, 2018 has been notified in the Gazette of India in February 2018.
 - o ECBC Cells have been established in all the States and Union Territories to provide handholding support to the SDAs.
- **Pilot demonstration of ECBC compliance in building projects:**
 - o Technical assistance has been provided for various ECBC demonstration projects (approx. 90 Nos.) for different categories of buildings in different climatic zones (accumulating 3 million sqm floor space) to showcase ECBC compliance across the Country

- **Training and capacity building on ECBC:**
 - More than seventy (70) workshops on ECBC have been conducted throughout the country.
 - Two (2) refresher workshops on ECBC 2017 have been conducted for the existing pool of (122) ECBC Master Trainers.

1.5.2.2 Energy Efficiency in Residential Buildings

Out of the total electricity consumed in the building sector, around 75% is used in the residential buildings. With "Housing for All" being one of the focus of the Government, the built-up area of residential buildings is expected to grow rapidly. Almost 2-3 crore new residential units are expected to be constructed under the "Housing for All" initiative by 2022.

Further, in response to the rapid increase in residential building stock, coupled with increase in electricity use for space conditioning, there is rapid increase in electricity use in residential buildings, BEE is developing a code for Residential Buildings. Data collected from a sample of urban middle-income apartments shows that electricity for providing thermal comfort contribute to 30- 60% of the annual electricity consumption. Another important aspect is thermal comfort, which is of utmost importance in all kinds of housing, and more so in case of affordable housing, to ensure health and well-being of the occupants.

BEE envisaged a phased approach for the development of the residential building energy conservation code. This approach entailed starting from a simple and implementable code (which can be integrated with the existing building codes/bye-laws), focusing on building envelope, for certain types of residential buildings with a clear roadmap for future development. Primary focus on building envelope is also justified as energy efficiency in appliances is already being addressed through a successful appliance labelling programme by the BEE.

The design of the building envelope has a direct impact on

- a. Heat conduction through the roof, opaque wall and glazed windows
- b. Solar radiation gains through glazed windows
- c. Natural ventilation
- d. Day-lighting

In the subsequent years, new components will be added to the Energy Conservation Building Code for Residential Buildings (ECBC-R), to address other aspects such as, Energy Efficiency in Electro-Mechanical Equipment for Building Operation, Renewable Energy Generation, Embodied Energy of Walling Materials and Structural Systems. The draft of the code addressing the Building Envelope is under finalization and expected to be launched shortly.

1.5.2.3 Launch of Eco-Niwas Website by the Hon'ble President of India

Bureau of Energy Efficiency, has developed an online portal - Eco-Niwas (Energy Conservation - New Indian Way for Affordable & Sustainable homes) including an interactive tool. Hon'ble President of India, Ram Nath Kovind, has launched the Eco-Niwas online portal and tool on the occasion of National Energy Conservation Day on 14th December, 2017.

Additionally, BEE has also published guidelines for the composite and hot-dry climate zone of India. Development of guidelines for energy-efficient design of new multi-storey residential buildings for the Warm-Humid climate zone covers almost 95% of the Indian population.

Energy Efficiency in Existing Buildings.

In order to promote a market pool for energy efficient buildings, Bureau of Energy Efficiency has developed a voluntary Star Rating Program for buildings. It is based on the energy usage in the building over its area expressed in kWh/sqm/year. This program rates buildings on 1-5 scale, with 5 star labelled buildings being most efficient. Star Labels for Day use Office Buildings, BPOs, Hospitals and Shopping Malls have been developed. A Total of 204 commercial buildings have been star rated under different categories of buildings under this program.

1.5.3 Energy Efficiency in Transport Sector

Transport sector being the largest guzzler of petroleum products, need to be monitored for the sake of conservation of petroleum. Vehicle sale is increasing day by day, causing increase in demand of petroleum products. Annual demand is estimated to increase by more than 25% in 2020-21 as compared to the demand for 2016-17. This will not only cause increased pollution, but also increase in petroleum import bill of the Govt. Therefore, it is imperative to optimize the consumption of petroleum by increasing efficiency of vehicles. Bureau has felt the need to define Efficiency norms for vehicles in India.

BEE has already notified Corporate Average Fuel Efficiency norms for passenger cars.

Fuel Efficiency norms were notified in August 2017 for Heavy Duty Vehicles (HDVs) also. These norms are applicable to the vehicles (Trucks & Buses) of GVW exceeding 12 tonnes.

1.5.4 Standards and Labeling Scheme

Standards and Labelling (S&L) scheme was initiated during the XIth five year plan with the key objective of providing consumers an informed choice regarding the energy savings and thereby the cost saving potential of various energy consuming appliances. S&L scheme covers the star labelling program for 21 appliances, out of which 10 appliances are under mandatory domain and remaining 11 appliances are under voluntary domain.

The vital benefits of S&L scheme are:

- (i) Significant impact on consumers while purchasing energy efficient appliances through a structured consumer awareness program.
- (ii) Market Transformation from non-energy efficient appliances to energy efficient appliances.

With the continuous efforts, BEE has magnificently reached the following milestones during the 2017-18 Financial Year:

- (i) An avoided generation capacity of 17559.89 MW.
- (ii) Transition of following two appliances from voluntary domain to mandatory domain
 - (a) Inverter AC
 - (b) LED Lamps
- (iii) Revision of the energy consumption standards for Colour Televisions and Room Air Conditioners with a view to up bring more energy efficient appliances in the market.

Awareness Corner

BEE has undertaken lot of activities to spread awareness about the S&L programme among the consumers via media (digital, print and television). The awareness activities include:

- (i) Release of advertisements regarding star labelling of LED Lamps in National Dailies.
- (ii) Broadcasting radio programs "BACHAT KE SITARE-DOST HAMARE" on AIR FM GOLD in Twenty languages in thirty cities.
- (iii) Retailers Training Programme is organized to disseminate knowledge among the retailers to enable them explain and convince customers to choose energy efficient appliance. 18 such programmes have been organized in 6 metro cities i.e. Delhi, Kolkata, Bengaluru, Mumbai, Chennai and Hyderabad and more than

2000 retailers have participated in these programmes.

1.5.5 Municipal Demand Side Management (MuDSM) Scheme

India is the home for more than 1.25 billion people which is currently the second largest in the world. India's population is projected to retain positive growth rate until 2050 and set to become the most populated country by 2025-30. This rising population along with better employment opportunities, rising income level and aspiration for a better quality of life are driving India's urban landscape. Census 2011 data reveals that for the first time since independence, the absolute increase in population is more in urban areas than in rural belts owing to much higher rate of growth of population in urban areas compared to rural counterpart. And the opportunity for urbanization is still quite high considering the current extent of urbanization at ~31%. This is expected to rise to 40% by 2030. This rapid expansion of urban population is creating huge pressure on infrastructure, housing, and other goods and services, which in turn, results in greater demand for resources including energy.

With more than 200 municipal corporations in India and more than 1000 other Urban Local Bodies (ULBs), India has the second largest municipal system in the World. Municipalities spend a significant percentage of their budgets in providing basic services like water supply and public lighting to the local communities. India's municipal sector consumes around 4% of total electricity consumed in the country and is deemed to be the second largest opportunity for energy conservation, accounting for 23% of energy use inefficiency in the country.

Way Forward:

The proposed activities under Mu DSM Scheme in SFC Memo for 2017- 2020 are:

- a. Driving nationwide awareness programs in MuDSM.
- b. Organizing training programs for Pump Technicians and technical assistance to other key stakeholders.
- c. Conducting M&V studies and developing standardized M&V protocols.
- d. Smart and affordable Electricity metering for rural and urban household sector in India

1.5.6 Agricultural Demand Side Management (AgDSM) Scheme

Agriculture sector is one of the most important sector of Indian economy. Agriculture plays a significant role in the overall socio-economic development of India. This sector accounts for approximately 80% of India's total water consumption. Pumps being the most vital element of the irrigation process and presently there are about 20 million pump sets presently energized in India and annual addition of 0.25 to 0.5 million pump sets are realized in this sector.

Agriculture sector consumes 20-22% of total electricity consumption. Managing agricultural load is increasingly becoming a challenge for electricity utility in India. Low or free electricity coupled with high inefficiencies contributes to adoption of local made inefficient & unreliable pump sets, results in massive water wastage & higher energy consumption.

Upgrading of existing pumping systems presents an immediate need and an unprecedented opportunity. The sector is dominated by highly in-efficient pump sets. The energy efficiency difference between inefficient pump set and BEE 5 star labelled pump set is approximately 26%. Therefore, there is a need to tap the huge energy savings potential promised in agriculture pumping sector.

Current Status of Activities:

- a. Five One day training programmes for farmers on 'Energy & Water Conservation' was conducted in KVK Jalna, Beed, Solapur, Akola, Amravati (Maharashtra) in January 2018.
- b. Tripartite agreement to replace approximately 9000 agricultural pumps has been signed between UPNEDA (on behalf of BEE), UPPCL and EESL. Currently, approximately 250 agricultural pumpsets have been replaced.
- c. Signing of MoU between BEE and Indian Council of Agriculture Research (ICAR) for carrying out the Farmer's Training Sessions at Krishi Vigyan Kendras (KVKs) of ten most energy intensive states is under process.

Way Forward:

The proposed activities under Ag DSM Scheme in SFC Memo for 2017- 2020 are:

- a. Revised framework towards mandating the use of BEE star labelled pump sets for new connections through SDAs.
- b. Driving nationwide awareness programs for farmers to promote the adoption of EE pumps.
- c. Organizing technical training programs for Pump Technicians.
- d. Supporting the setting up of testing labs for agriculture pump sets.

1.5.7 Small and Medium Enterprises (SMEs)

Background

Micro, Small and Medium Enterprises (MSME) sector has emerged as a highly vibrant and dynamic sector of the Indian economy contributing significantly to the GDP and manufacturing output. 63 Million MSMEs in India not only play crucial role in providing employment to more than 110 Million people at comparatively lower capital cost than large industries but also help in industrialization of rural & backward areas, thereby,

reducing regional imbalances, assuring more equitable distribution of national income and wealth.

Indian MSME sector consumes energy equivalent to about 35 million tons of oil equivalent annually, which is about 30% of the energy consumption by large industries. SMEs in India are existing in form of clusters which are spread across the length and breadth of the country. Technology need assessment and technology development to suit the requirements of the local MSMEs at the cluster level has emerged as one of the most important aspects that needs to be addressed in the MSME sector.

1.5.7.1 BEE - SME Programme

Driven by the need of the sector, "National Program on Energy Efficiency and Technology Upgradation in SMEs" have been undertaken by Bureau of Energy Efficiency towards the aim of accelerating the adoption of energy efficient technologies and practices in a few chosen industry clusters through focused studies, knowledge sharing, preparation of detailed project reports and facilitating the process of developing innovative financing mechanisms.

These are the highlights of the Programme Achievements in the year 2017 - 2018.

1. Implementation of demo projects in the Five SME units of Pali Textile Cluster, Two units of Varanasi Brick Cluster and Seven Units of Indore Food Cluster.
2. Post implementation energy audits were conducted in these clusters to measure the savings achieved by implementation of Energy Efficiency technologies.
3. Dissemination of the information generated during the project to replicate the technologies intensively in the SME cluster.
4. Preparation of sector specific case studies, best operating practices and common monitorable parameters documents to strengthen the thought of energy efficiency and encourage further improvements in the routine practices followed by the SME entrepreneurs.
5. Development of Audio-Video tutorials for Indore Food Cluster and Pali Textile Cluster as an ideal way to motivate the unit owners and replication of the technologies in the cluster.
6. National Summit on Energy Efficiency in SMEs was organized to review and discuss various project activities for further scaling up the project for transformational results.

Nation Summit on Energy Efficiency in MSMEs

BEE has also made interventions and implemented EE technologies in other energy intensive clusters of India with the support of UNIDO and World Bank towards the common goal of facilitating the development of the SME sector in India through the promotion and adoption of clean, energy efficient technologies and practices.

1.5.7.2 GEF - UNIDO - BEE Project

The project "Promoting Energy Efficiency and Renewable Energy in MSMEs in India" aims towards developing and promotion of market environment for introducing energy efficient technologies and enhancing the use of renewable energy technologies in process applications in energy-intensive MSMEs in twelve clusters which are broadly classified into five sectors (i.e. Brass, Ceramics, Dairy, Foundry and Hand tools).

Some of the key achievements under this programme are -

1. Establishment of 9 Energy Management Cells.
2. Capacity building of more than 200 entrepreneurs and local service providers through knowledge dissemination workshops towards adoption of best operating practices and new Energy Efficiency technologies.
3. Preparation of more than 100 Case Studies and 40 DPRs on various energy efficient technologies.
4. Implementation of more than 300 distinct energy savings and renewable energy saving options in the clusters.

1.5.7.3 GEF - WB - BEE Project

The project "Financing of Energy Efficiency at MSMEs" is part of the Global Environmental Facility (GEF) Programmatic Framework for Energy Efficiency in India with an objective to increase demand for energy efficiency investments in target micro, small and medium enterprise clusters and to build their capacity to access commercial finance.

The project aspires to address the current gap in understanding between energy auditors and bank loan officers and demonstrate a viable mechanism of synergic tie up

between SMEs, Energy Auditors, Financial Consultants/Chartered Accountants, Local Industrial or MSME associations and local bankers.

1.5.8 Capacity Building of DISCOMs

Background

Demand Side Management (DSM) measures in the Energy Sector is a cost-effective tool. As a customer strategy, DSM programs encourage the installation of end-use technologies that consume less energy, thereby reducing and/or shifting the customers' overall electric bill. DSM programs can help utilities to reduce their peak power purchases on the wholesale market, thereby lowering their overall cost of operations.

The capacity building and other support is essential for the DISCOMs to implement DSM in their respective areas. In this context, Bureau of Energy Efficiency has launched a programme for capacity building of DISCOMs. This will help in capacity building of DISCOMs and development of various mechanisms to promote DSM in their respective states.

Activities & Achievements

The objective of the programme is to carry out load management programme, development of DSM action plan and implementation of DSM activities in their respective areas. The following activities have been initiated so far under this programme.

- 34 DISCOMs have been selected for participating as beneficiary DISCOMs under this programme.
- Memorandum of Understanding (MoU) has been signed between BEE and selected 34 DISCOMs under which targets for the DISCOMs have been incorporated.
- DSM Cell has been established by 34 DISCOMs.
- DSM regulation has been notified in 19 States for 27 DISCOMs.
- Manpower Support has been provided to each DISCOM for facilitation of DSM related activities.
- Load survey and development of DSM action plan has been initiated for 34 DISCOMs. The Load survey and DSM action plan has been prepared for 34 DISCOMs.
- National Power Training Institute was engaged by BEE to conduct training programmes for the officials of DISCOMs to create Master Trainers on DSM and Energy Efficiency. Under this programme 504 officials of 32 DISCOMs had been trained as Master Trainers under Training of Trainers activity.

- Four agencies have been selected for organizing training programmes for the circle level officials of DISCOMs. About 5000 officials are expected to participate in these training programmes. Till date 85% of the total participants have been trained in these training programmes.
- Another 27 DISCOMs are targeted to participate under the scheme during 2017-2020.
- Engagement of Project Management Consultant (PMC) for undertaking activities under "Capacity Building of DISCOMs" for these 27 DISCOMs and existing DISCOMs is under process.

1.5.9 Strengthening of State Designated Agencies (SDAs)

The State Designated Agencies (SDAs) have been notified by the State Governments under section 15 (d) of the Energy Conservation Act, 2001 either by establishing a stand-alone SDA or by assigning additional responsibilities to the existing agencies / departments. 35 SDAs have been notified under EC Act. Out of these 35 SDAs, 16 are Renewable Energy Development Agencies, 4 are Power Department of State Governments, 7 are Electrical Inspectorate offices, 6 are Distribution Companies and 2 are "Stand-Alone" SDAs. The major roles and responsibilities of SDAs are to coordinate, regulate and enforce various provisions of the Energy Conservation Act at the State level.

In order to implement energy efficiency measures and reduce energy intensity of the country, the Ministry of Power approved the scheme on "Strengthening of SDAs on the efficient use of energy and its conservation" during the XI plan, which was continued during the XII plan. The scheme comprises of the following two major components:

- Providing financial assistance to the State Designated Agencies to coordinate, regulate and enforce efficient use of energy and its conservation.
- Contribution to State Energy Conservation Fund (SECF).

A) Providing financial assistance to the State Designated Agencies:

During 2017-18, an amount of Rs. 22.61 Crore was disbursed to 21 SDAs for implementation of the following components:-

- State Partnership for Energy Efficiency Demonstrations (SPEED) - Demonstration projects mainly in areas of street lighting, water pumping, waste heat recovery, heating, ventilation and air conditioning, etc., are implemented by the SDAs. These projects are successful in facilitating most of the state governments in replicating the demonstrated technology through various departments / agencies.
- Model Energy Efficient Village Campaign - SDAs utilize the fund released under

this head to make entirely electrified villages comprising 200 to 250 households, model energy efficient village by replacing existing inefficient equipment with BEE star labelled / energy efficient appliances which include water pumps, fans, gas stoves, diesel generators, water heaters, street lights and household lighting.

- Institutionalization of Enforcement Machinery at state level - Fund released under this head enables the SDAs to regulate and enforce provisions of the EC Act effectively.
- Manpower support to SDAs - This fund enables the SDAs to engage manpower to smoothly coordinate, administer, regulate and enforce activities pertaining to energy efficiency in the states.
- State Energy Efficiency Research & Outreach Programme - Energy efficiency programmes are promoted by the SDAs through electronic and print media, awareness campaigns, through brochures and banners etc.
- Workshops / Capacity Building of energy professionals
- Maintenance and updation of Internet Platform and other database created on energy efficiency

B) Contribution to State Energy Conservation Fund (SECF)

Section 16(1) of the Energy Conservation Act 2001 requires State Governments / U.T. Administrations to constitute a fund called SECF for the purpose of promotion of efficient use of energy and its conservation within the state. In this context, a scheme called "Contribution to State Energy Conservation Fund (SECF)" was approved by Ministry of Power during the XI plan, which was continued during the XII plan. The SECF is used as an instrument to facilitate implementation of energy efficiency projects through market transformation. For undertaking energy efficiency projects, major part of the fund disbursed under SECF is to be earmarked separately as Revolving Investment Fund (RIF). This RIF is used to finance implementation of various energy efficiency projects.

The scheme contributes with a maximum ceiling of Rs. 4.0 Crores to all the states and U.Ts with Rs. 2.0 Crores each in two instalments. The second instalment of contribution to SECF is released only after the states have provided a matching contribution to the BEE's first instalment. An exemption for the North Eastern States is that the matching contribution by State Government for North Eastern States is relaxed to Rs. 25.0 Lakhs instead of Rs. 2.0 Crores. During 2017-18, fund amount of Rs. 2.0 Crores each was disbursed to the SDAs of Mizoram and Sikkim towards second installment to respective State Energy Conservation Fund. Till date, 28 states have constituted SECF out of which 24 states have also provided matching contribution.

During 2017-18, two National Workshops were held at Visakhapatnam and Lucknow to review the physical & financial progress of the SDAs and to discuss the future course of action on the activities to be undertaken by them.

National Workshop for SDAs at Vishkhapatnam

BEE-IGEN Partnership Summit at Lucknow

1.5.10 National Certification Examination for Energy Managers and Energy Auditors

As per the Energy Conservation Act 2001, it is mandatory for all the designated energy consumers to get energy audit conducted by an Accredited Energy Auditor and to designate or appoint an Energy Manager.

BEE has created a cadre of professionally qualified Energy Managers and Auditors with expertise in energy management, project management, financing and implementation of energy efficiency projects, and policy analysis. BEE has regularly conducted the National Certification Examination, nation-wide, for Energy Managers and Energy Auditors since May 2004.

The country has now total 15717 no. of Energy Auditors and Energy Managers, out of which 9443 are qualified as Certified Energy Auditors, from the previous 18 examinations conducted during 2004-2017. The capacity building of energy managers and energy auditors through National Certification Examination route will have a long-term impact on the Indian economy by making it less energy intensive.

1.5.10.1 Accreditation of Certified Energy Auditors

The Energy Conservation Act, 2001 provides powers to the Central Government to designate energy intensive industrial units and other establishments as "Designated Consumers", who inter-alia, periodically have to get the energy audit carried out by Accredited Energy Auditors. The Act also mandates the Bureau of Energy Efficiency to accredit energy auditors for this purpose.

The certified energy auditors are assessed and recommended for accreditation by the Accreditation Advisory Committee, which is chaired by the Director General, BEE and members drawn from Central Electricity Authority, Ministry of Petroleum and Natural Gas and Ministry of Coal. These recommended names are then approved by the

Management Advisory Committee of the Bureau.

At present there are 238 Accredited Energy Auditors in the country.

1.5.10.2 Empanelment of Accredited Energy Auditor Firms under PAT

It is mandatory for all Designation Consumers (DCs) to get Measurement & Verification (M&V) work from Accredited Energy Auditor empanelled firms. At present total no. of 52 Empanelled Accredited Energy Auditor firms are operating to undertake the function of verification and check verification including Measurement & Verification (M&V), regarding compliance with the energy consumption norms and standards and issue or purchase Energy Saving Certificates under Perform Achieve and Trade (PAT) scheme.

1.5.11 Awareness and Outreach

Climate change and sustainability are linked to endeavors of the Bureau of Energy Efficiency (BEE) to make people aware of their responsibilities towards building a sustainable life. As part of its mandate to promote energy efficiency and conservation, BEE has undertaken multimedia energy awareness campaign to inculcate the habit of conservation and sustainability. The objective is to enhance awareness level amongst the public on energy efficiency and inform them about the virtues of adopting energy conservation. People are also made aware of the quality and standard issues of energy intensive appliances.

The media campaign comprising electronic, outdoor and print medium was released through DAVP & NFDC as per policy of the Ministry of Information and Broadcasting. Jingles like ("BUTTON DABAO BIJLI BACHAO", EK LEHER. etc) video/audio spot was telecasted on Doordarshan, TV channels, FM stations. Messages were also displayed on LED/LCD screens at various railway stations, metro stations, trains, buses and other public utility places across the country. The advertisements on energy conservation in Hindi and vernacular languages were also released in print media to promote labeling programme for LED, INVERTER AC, REFRIGRATORS, etc. The 60-minute Radio Mirchi programme aired the interaction with public on energy efficiency appliances in the New Delhi region. In addition to above, BEE also participated in the 4th Vibrant India-2017 and Meri Dilli Utsav on 13th, 14th and 15th October, 2017 at Pitampura Dilli Haat, New Delhi to showcase various Energy Efficiency policies, achievements, programs, schemes and activities.

Salient points of Awareness Campaign

- (a) Print, electronic and social media was used effectively for propagating messages on energy efficiency and its conservation.
- (b) 156 episodes of "Bachat Ke Sitare" were broadcast on AIR FM Gold.
- (c) 100 nos. of bill boards in 20 nos. of cities were displayed containing messages of energy conservation.

- (d) Video clips on energy conservation were shown in more than 900 cinema halls across the country.
- (e) Exhibition, Radio spots/ jingles were broadcast on FM channels across India.
- (f) Bureau's web portals, Facebook, YouTube channel, Twitter Handle were also continuously updated to propagate message of energy conservation.
- (g) Tableaux of Ministry of Power/ BEE on energy efficiency reached up to the final selection level for 26th January, 2018.

1.5.12 Students Capacity Building Program/ Student Awareness

Student Capacity Building for Energy Efficiency under Awareness Programme includes the following activities:

- Inclusion of chapter on Energy Efficiency in school curriculum of State Education Boards and NCERT Books of 6th to 10th standards.
- Introduction of module on Energy Efficiency and Energy Conservation in the syllabus/books of school education boards.
- Training, skill up gradation of Teaching Staff, Energy Professionals and Technical Staff
- Development of Tip Sheet/fliers on energy efficiency for efficient use of utilities like pumps/boilers/heaters/chillers/fans etc.
- Awareness Activities like Debates at ITIs/Diploma Engineering Colleges and Quiz Programmes at School level
- Initiation/Replication/Strengthening of Eco/Energy Clubs

State Designated Agencies (SDAs) were supported to implement awareness programs in their respective states. 19 states have established / Strengthen 2224 Energy Clubs in schools.

1.5.13 National Energy Conservation Award and Painting Competition

1.5.13.1 National Energy Conservation Award

The National Energy Conservation Awards scheme has been in operation since 1991. It recognizes innovation and achievements in energy conservation by the industries, transport, institutions, buildings and appliances and raise awareness that energy conservation plays a big part in India's response to reducing global warming through energy savings. The scheme has motivated industry and other establishment to adopt energy efficiency measures.

The Award Scheme has motivated the participating units to undertake serious efforts in saving energy and environment. In the last 19 years of Award Scheme 1999-2017 - the participating units have collectively saved Rs. 37212 Crores, the investment made on

energy efficiency projects was recovered back in 15 months. In energy terms, 44120 Million kWh of electrical energy, 51 lakhs kilolitre of oil, 226 lakhs metric tonne of coal and 250 billion cubic metre of gas were saved through the energy conservation measures by the participating units.

In 2017 Awards, 14 units for First prize, 15 units for Second Prize, 22 units for Certificate of Merit and 6 Awards for the Most Energy Efficient Appliance of the Year were awarded. Hon'ble President of India was the Chief Guest for the NECA - 2017 award function held at Vigyan Bhawan on 14th December, 2017.

The participating units of 2017 Awards have collectively invested Rs. 1495 Crores in energy conservation measures and achieved a monetary savings of Rs. 1895 Crores last year, having an average payback period of 9.5 Months. The participating units have saved electrical energy of 2762 Million kWh of electrical energy, which is equivalent to the energy generated from a 527 MW at a PLF of 59.88%. In other words, these participating units have avoided the installation of power generating capacity equivalent to 527 MW in 2016-17, which would otherwise have been required to meet the power demand of these units.

NATIONAL ENERGY CONSERVATION AWARD WINNERS - 2017

ALUMINIUM

2nd Prize : HINDALCO Industries Limited,
Muri Works Ranchi (Jharkhand)

AUTOMOBILE MANUFACTURING

1st Prize : Tata Motors Limited, Jamshedpur (Jharkhand)

2nd Prize : Mahindra & Mahindra Limited, Auto Division,
Zaheerabad Plant, Medak (Telangana)

Certificate of Merit : Tata Motors Limited, Pimpri, Pune (Maharashtra)

AUTOMOBILE MANUFACTURING (Ancillary)

1st Prize : Endurance Technologies Limited,
Aurangabad (Maharashtra)

2nd Prize : Engine Factory, Avadi, Chennai (Tamil Nadu)

Certificate of Merit : Subros Limited, Manesar (Haryana)

CERAMICS

1st Prize : Crystal Ceramic Industries Private Limited,
Mehsana (Gujarat)

Certificate of Merit : CERA Sanitaryware Limited, Kadi (Gujarat)

DAIRY

1st Prize : Mother Dairy Fruit & Vegetable Private Limited,
Patparganj (New Delhi)

2nd Prize : Heritage Foods Limited, Chittoor (Andhra Pradesh)

FERTILIZERS (Urea)

1st Prize : National Fertilizers Limited, Panipat (Haryana)

2nd Prize : Indian Farmers Fertilizer Cooperative Limited,
Aonla Unit-II, Bareilly (Uttar Pradesh)

Certificate of Merit : 1) Indian Farmers fertilizer Cooperative Limited,
Phulpur, Unit-II, Allahabad (Uttar Pradesh)
2) Grasim Industries Limited,
Unit-Indo Gulf Fertilizers, Amethi (Uttar Pradesh)
3) National Fertilizers Limited, Nangal (Punjab)

FERTILIZERS (Phospha'te)

2nd Prize : IFFCO Paradeep, Jagatsinghpur (Odisha)

**FORGING**

- 2nd Prize : L&T Special Steels & Heavy Forgings Private Limited, Surat (Gujarat)
- Certificate of Merit : S.N. Metallurgical Associates, Aurangabad (Maharashtra)

MINING

- 2nd Prize : Sindesar Khurd Mine, Hindustan Zinc Limited - Vedanta Resources PLC, Rajsamand (Rajasthan)
- Certificate of Merit : Mine-1, NLC India Limited, Neyveli (Tamil Nadu)

MUNICIPALITIES

- 1st Prize : South Delhi Municipal Corporation (New Delhi)
- Certificate of Merit : Directorate of Local Bodies, Department of Local Self Government, Jaipur (Rajasthan)

OFFICE AND BPO BUILDINGS**(Above 10 Lakh Units)**

- 1st Prize : Shastri Bhawan, CPWD (New Delhi)
- 2nd Prize : Sanchalan Bhavan, South Central Railway, Secunderbad Division, Secunderabad (Telangana)
- Certificate of Merit : 1) ICICI Bank Limited - Empire Tower, Lower Parel (Mumbai)
- 2) Secunderabad Station Building, South Central Railway, Secunderabad Division, Secunderabad (Telangana)
- 3) ICICI Bank Limited- Chandivali (Mumbai)

OFFICE AND BPO BUILDINGS**(Below 10 Lakh Units)**

- 1st Prize : Rajasthan Electronics & Instruments Limited (A Govt of India Enterprises) Jaipur (Rajasthan)
- 2nd Prize : DRM Office Building, Western Railway, Bhavnagar Para (Gujarat)
- Certificate of Merit : 1) Divisional Railway Manager Office, Rajkot (Gujarat)
- 2) General Post Office, Nagpur (Maharashtra)
- 3) ICICI Bank Limited-Heritage Chambers Ahmedabad (Gujarat)

PAINTS & ALLIED PRODUCTS

2nd Prize	: Beepee Coatings Private Limited, Kheda (Gujarat)
Certificate of Merit	: Kansai Nerolac Paints Limited, Rewari (Haryana)

PETROLEUM PIPELINE

Certificate of Merit	: IOC KOT Pumping Station, Pali (Rajasthan)
----------------------	--

RAILWAY WORKSHOPS

1st Prize	: Central Workshop, Southern Railway, Ponmalai Tiruchirappalli (Tamil Nadu)
2nd Prize	: Railway Carriage Workshop, Jodhpur (Rajasthan)
Certificate of Merit	: Carriage & Wagon Workshop - Jagadhri Workshop, Northern Railway, Yamuna Nagar (Haryana)

REFINERY

1st Prize	: Bharat Oman Refineries Limited, Bina (Madhya Pradesh)
2nd Prize	: Indian Oil Corporation Limited- Bongaigaon Refinery, Chirang (Assam)

STATE DESIGNATED AGENCIES

1st Prize	: Energy Management Centre, Thiruvananthapuram (Kerala)
2nd Prize	: Andhra Pradesh State Energy Conservation Mission, Vijaywada (Andhra Pradesh)
Certificate of Merit	: 1) Maharashtra Energy Development Agency, Pune (Maharashtra)
Certificate of Merit	: 2) State Designated Agency, Bhubaneswar (Odisha)

THERMAL POWER STATIONS

(Coal Fired Plants > 100 MW Capacity)

1st Prize	: GMR Warora Energy Limited, Warora (Maharashtra)
2nd Prize	: Mouda Super Thermal Power Project, NTPC Nagpur (Maharashtra)

THERMAL POWER STATIONS

(Gas Fired Plants > 100 MW Capacity)

1st Prize	: NTPC Limited-Kawas Gas Project, Surat (Gujarat)
Certificate of Merit	: Pragati Power Station, Himadri (New Delhi)

THERMAL POWER STATIONS

(Coal & Gas Fired Plants < 100 MW Capacity)

1st Prize	: Ultra Tech Cement Limited-Kotputli Cement Works Jaipur (Rajasthan)
Certificate of Merit	: Ultra Tech Cement Limited-Awarpur Cement Works Thermal Power Plant, Chandrapur (Maharashtra)

MOST ENERGY EFFICIENT APPLIANCES OF THE YEAR

Air Conditioners (Fixed & Variable Speed Air Conditioners)

Model No.	: JTKM50SRV16+RKM50SRV16 (Daikin Airconditioning India Private Limited)
-----------	--

Ceiling Fans

Model No.	: Asset Deco 50 (Crompton Greaves Consumer Electricals Limited)
-----------	--

Refrigerator (Direct Cool & Frost Free Refrigerator)

Model No.	: RD Edge Pro 190 PDS 5.2 (Godrej & Boyce Mfg. Co. Limited)
-----------	--

Storage Water Heater

Model No.	: RACOLD ESWH - 25V (Ariston Thermo India Private Limited)
-----------	---

Color Television

Model No.	: LED-3219 (Inteqx Technologies India Limited)

1.5.13.2 Painting Competition on Energy Conservation for School Children

School going children play an important role to bring in desired changes in the society by not only involving their parents, brothers and sisters but also others like teachers, neighbors etc.

In the outlook towards sensitizing the school children on Energy Efficiency along with Energy Conservation in domestic sector, the Ministry of Power (MoP), Government of India (GoI) undertakes pan India National Awareness Campaign by organizing School Children Painting Competition for 4th ,5th and 6th Standards under Category 'A' and for 7th , 8th and 9th standards under Category 'B'.

This competition is held in three stages, namely, School, State and National Level. Cash prizes worth Rs. 95,000 per State/UT per Category (Rs.34.20 lakhs for 36 States/UTs per Category or Rs. 68.40 lakhs for both Categories) are distributed to State Level winners. For winners of both the categories of National Competition, cash prizes worth Rs. 10.35 lakhs were awarded on 14 December, 2017. A record number of 1.22 crore students participated during 2017 which was about 8% higher than that in the previous year. Hon'ble President of India Sh. Ram Nath Kovind presented the 1st, 2nd and 3rd prizes to 19 National level winners in a function held at Vigyan Bhawan, New Delhi.

1.5.14 Miscellaneous

Energy Conservation Information Collection System

Bureau of Energy Efficiency has developed an online platform called PATNet portal for submission of various information related to energy consumption and production and other related information. The key stakeholders involved such as the designated consumers and officials of BEE, Ministry of Power, State Designated Agencies (SDAs) have also been provided access to the platform for collection, monitoring and evaluation of information.

1.6 Governing Council Composition

The general superintendence, direction and management of the affairs of the Bureau vest in the Governing Council which consist of not less than twenty, but not exceeding twenty six, members to be appointed by the Central Government. The Governing Council consists of the following members:

- (a) The Minister in charge of the Ministry or Department of the Central Government dealing with the Power
 - ex officio Chairperson
- (b) The Secretary to the Government of India, in charge of the Ministry or Department of the Central Government dealing with the Power
 - ex officio member

- (c) The Secretary to the Government of India, in charge of the Ministry or Department of the Central Government dealing with the Petroleum and Natural Gas
- ex officio member
- (d) The Secretary to the Government of India, in charge of the Ministry or Department of the Central Government dealing with the Coal
- ex officio member
- (e) The Secretary to the Government of India, in charge of the Ministry or Department of the Central Government dealing with the Non-conventional Energy Sources
- ex officio member
- (f) The Secretary to the Government of India, in charge of the Ministry or Department of the Central Government dealing with the Atomic Energy
- ex officio member
- (g) The Secretary to the Government of India, in charge of the Ministry or Department of the Central Government dealing with the Consumer Affairs
- ex officio member
- (h) Chairman of the Central Electricity Authority
- ex officio member
- (i) Director-General of the Central Power Research Institute
- ex officio member
- (j) Executive Director of the Petroleum Conservation Research Association
- ex officio member
- (k) Chairman-cum-Managing Director of the Central Mine Planning and Designing Institute Limited
- ex officio member
- (l) Director-General of the Bureau of Indian Standards
- ex officio member
- (m) Director-General of the National Test House, Department of Supply, Ministry of Commerce and Industry
- ex officio member
- (n) Managing Director of the Indian Renewable Energy Development Agency Limited
- ex officio member

- (o) One member each from the five power regions representing the States of the region to be appointed by Central Government
 - Member
- (p) Such number of persons, not exceeding four as may be prescribed, to be appointed by the Central Government as members from amongst persons who are in the opinion of the Central Government capable or representing industry, equipment and appliance manufacturers, architects and consumers
 - Members
- (q) Such number of persons, not exceeding two as may be nominated by the Governing Council as members
 - Members
- (r) Director-General of the Bureau of Energy Efficiency
 - ex officio Member-Secretary

7th Meeting of the Governing Council of the Bureau of Energy Efficiency was held on 12th February, 2018 under the Chairmanship of Sh. R. K. Singh, MOS (I/C) for Power & NRE.

2

International Co-operations

- 2.1 International Bilateral Programmes
- 2.2 International Multilateral Programmes

2.1 International Bilateral Programmes

A. Countries with Active Participation

(i) Indo-German Energy Programmes

• Indo German Energy Forum (IGEF)

The Indo-German Energy Forum (IGEF) was established in April, 2006 between Government of the Federal Republic of Germany and Republic of India to intensify the Indo-German Co-operation to promote dialogue and cooperation with involvement of public and private sector in the areas of energy security, energy efficiency, renewable energy, investment in energy projects and collaborative R&D. While the IGEF is a high-level policy dialogue between India and Germany, the IGEF Support Office is incorporated in the structure of the Indo-German Energy Programme (IGEN).

Under the Indo-German Energy Forum there are 3 sub-groups. Sub-group 1 is efficiency enhancement in fossil fuel-based power plants, sub-group 2 is renewable energy and sub-group 3 is demand side energy efficiency and low carbon growth strategies. In the sub-group 3, the Indian Ministry of Power (MOP) and the German Federal Ministry of Economic Affairs and Energy (BMWi), together with the Federal Ministry for the Environment, Nature Conservation, Buildings and Nuclear Safety (BMUB) are working together to put in place a positive environment for enhancing energy efficiency in their respective countries. This is achieved by facilitating a constructive dialogue between decision-makers in government and the private sector in both countries.

As on date, seven IGEF meetings have been held, the last meeting was held on 12th December, 2017. The Indian side was co-chaired by Shri Abhay Bakre - Director General, Bureau of Energy Efficiency while German side was co-chaired by Dr. Georg Maue, Deputy Head of Division, General issues of energy efficiency Federal Ministry for Economics and Energy (BMWi), Government of Germany. The meeting was attended by representatives of Bureau of Energy

Efficiency (BEE), Embassy of Germany, KfW and GIZ.

The previous activities undertaken through the Sub Group 3 are as below

- ▶ The opportunities for combined heat and power generation has been discussed since a long time and now with the cooperation of GIZ, a demo trigeneration plant was set up at the Jai Prakash Narayan Apex Trauma Center, New Delhi.
- ▶ In the residential buildings sector, Fraunhofer institute and TERI jointly developed an energy performance assessment tool which calculates energy saving potential for various energy efficiency measures in the residential buildings in India.
- ▶ For developing an international internet based knowledge platform for energy efficiency in various fields, the German side has taken an initiative named bigEE which means "Bridging the Information Gap on Energy Efficiency".

The ongoing set of activities through the Sub Group 3 were also reviewed during the Sub-Group 3 meeting held on 12th December, 2017.

- ▶ Considering the growing cooling demand in India, the German side during the last Sub Group - 3 meeting held through teleconferencing on 15th September, 2016 expressed a need for the study to assess the cooling demand in India which can also highlight the feasibility of District Cooling to which Indian co-chair agreed. In this regard, a study on Cooling Demand in India in 2027 has been carried out and both sides are in the process of finalization of the report.
- ▶ Under the Indo German Energy Forum (IGEF), Energy Efficient Cooling has been identified as an area of collaboration. In this regard, the concurrence of DEA for undertaking Energy Efficient Cooling has been received.
- ▶ Conducted a study on Energy Efficiency potential in India by TERI.

- **Indo German Energy Programme (IGEN)**

The Indo-German Technical Co-operation in the field of Energy Conservation has been going on since 1995, when the Indo-German Energy Efficiency project, was launched in May 1995, by the Energy Management Centre, a predecessor organization of the Bureau of Energy Efficiency (BEE), through Tata Energy Research Institute, Bangalore. The project was completed in September 2000. With the enactment of the Energy Conservation Act 2001 and establishment of Bureau of Energy Efficiency with effect from 1st March 2002, the cooperation in the field of energy conservation continued under the project "Indo-German Energy Programme (IGEN) with the objective to support policies and programmes of the Energy Conservation Act. With the successful

implementation of Phase - I, Phase - II of the programme was launched with effect from October, 2013 for the duration of four years ending in September, 2017.

Phase - III of the programme: In the PAT Cycle-II, three new sectors are included as designated consumers, which are Refinery, Railways and DISCOMs. A similar process for PAT Cycle-II is required to be followed for these sectors as was followed in PAT Cycle-I.

The GIZ has considered providing TA support for the following activities:

- ▶ Under the Indo German Energy Programme (IGEN), Energy Efficient Cooling has been identified as an area of collaboration. During the review meeting of Indo German Consultations on Development Cooperation held on 19th June, 2017 at Delhi, the German Ministry of Environment, Nature Conservation, Building and Nuclear Safety (BMUB) had in principle agreed to consider funding the Energy Efficient Cooling Project. In this regard, the Preliminary Project Report (PPR) on Energy Efficient Cooling has been sent by BEE to Ministry of Power. The PPR broadly spells out the overall objectives and activities which will be undertaken under the Energy Efficient Cooling Project. The project cost is estimated to be Rs 21 crores / Euro 3 million with an implementation period from April 2018 to March, 2021. The PPR is currently under consideration at DEA.
- ▶ BEE and GIZ under the framework of IGEN has signed supplementary agreement (w.r.t to the existing Implementation agreement between BEE and GIZ under IGEN) on 14th December, 2017 to formalize the collaboration in the residential buildings sector.
- ▶ An online tool - ECO-NIWAS has been jointly developed by BEE and GIZ to guide the public in incorporating energy efficiency elements in their homes, such as building materials, its design features and appliances. The website will also provide useful information about the energy saving potential by adopting these energy conservation measures. The portal was launched by Hon'ble President of India on National Energy Conservation Day, 2017.
- ▶ The support from the German side has been instrumental in successful completion of PAT cycle - I and the partnership has been continued by taking up subsequent cycles of PAT through expansion of coverage by inclusion of new sectors as well as enhancing industries covered under the existing sectors of PAT. Also, in order to penetrate energy efficiency in the residential buildings sector, BEE and GIZ have been working together for formulating energy efficiency building codes for the multi-storey residential buildings.

- ▶ German Federal Ministry for Economic Cooperation and Development (BMZ) has agreed on enhancing the scope of the IGEN Implementation Agreement signed on 8th August, 2017 with following addendums in the project objectives with an extension of services till 31st December, 2020
- ▶ Technical Assistance towards development of National Energy Efficiency Standards for New Large Residential Buildings
- ▶ Support to incorporate provisions regarding mandatory introduction of Energy Efficiency Standards in New Multi-Storey Residential Building. In view of this, GIZ has submitted to DEA the draft of supplementary agreement.

(ii) Indo -Japan Energy Dialogue

As an outcome of the visit of Hon'ble Prime Minister of India to Japan in December 2006, Indo-Japan Energy Dialogue co-chaired by Deputy Chairman Planning Commission and Minister of Ministry of Economy Trade and Industry METI was initiated to promote cooperation in energy sector. The 9th meeting of the Japan-India Energy Dialogue, co-chaired by His Excellency Mr. Hiroshige Seko, Minister of Economy, Trade and Industry (METI) of Japan, and Shri Raj Kumar Singh, Hon'ble Minister of State for Power, and New and Renewable Energy of India was held in Delhi on 1st May, 2018.

• **LATEST DEVELOPMENTS:**

- ▶ During the Working Group meeting held on 31st May 2017, discussions were held on the cooperation project on Energy Conservation Guidelines and Energy Management Manual, Capacity Building of Energy Manager & Energy Auditor, Waste Heat Recovery, Heat Pump in Buildings, Best practice guide in the foundries sector etc.
- ▶ A workshop was organized in New Delhi on 12th October, 2017 wherein the Indian side addressed the current status and future plans to improve energy efficiency and enhance grid stability. The Japan-side explained about state-of-art technologies (e.g., application of IoT) to address the needs of the India-side. Participants from Ministry of Power (MoP), the Bureau of Energy Efficiency (BEE), the Central Electricity Authority (CEA), many Governmental/Semi-Government agencies, Ministry of Foreign Affairs, Embassy of Japan in India, the New Energy and Industrial Technology Development Organization (NEDO) as well as private sectors attended the workshop.
- ▶ Second workshop was organized in Japan during 15-19 January 2018 wherein members from steering committee of EC Guidelines, sector experts, experts from Energy Conversation Centre, Japan (ECCJ) and

DC's were invited to provide feedback on draft guidelines. The aim of the workshop was to assist India to finalize EC Guideline with comments of Japanese Experts. Based on the inputs received from participants during the workshop and comments received from ECCJ the draft of EC Guidelines was modified.

- ▶ The final Energy Efficiency Guideline document for Indian Industries is likely to be launched in May 2018, in India.

- **ACTIVITIES UNDERTAKEN:**

- ▶ Development of Energy Conservation Guidelines and Energy Management Manual

A meeting was organized at Bureau of Energy Efficiency on 17th November, 2016 to discuss the Energy Conservation Guidelines and Energy Management Manual that are being used by the Industries in Japan. The participation was of officials of Bureau of Energy Efficiency (BEE), Energy Conservation Centre, Japan (ECCJ), The Energy and Resources Institute (TERI) and Designated Consumers (DCs) of various industry sub-sectors. The benefits of the Energy Conservation Guidelines and Energy Management Manuals being used by the industries in Japan were highlighted. These guidelines and manuals would also help Indian Industries in achieving energy efficiency.

A meeting cum workshop was held in Japan during 23rd to 27th February, 2017 to understand in details the Energy Conservation Guidelines and Energy Management Manuals for Industrial sector.

First meeting of steering committee was held on 21st September 2017 at New Delhi to discuss the EC guidelines drafted for Indian industries and the implementation plan for the FY 2017-18.

Based on feedback received from the industrial association, another workshop was held at Tokyo from 15th January to 19th January, 2018 to take up 2nd draft of Energy Conservation Guidelines and Energy Management Manual. The workshop in Japan was attended by Ministry of Power, Central Electricity Authority (CEA), BEE and TERI officials. Second round table discussion was also organized on 26th February, 2018, to deliberate on the revised draft of EC guideline.

- **NEDO Demonstration Projects**

- ▶ The model project for sinter cooler waste heat recovery in Andhra Pradesh
- ▶ The model project for increasing the efficient use of energy by a coke dry

quenching system (CDQ) in Jharkhand.

- ▶ The model project for waste heat recovery system of cement plant in Andhra Pradesh
- **Joint Policy Researches**
 - ▶ Potential market and technology survey on Steel, Cement, Machine tools and Inverter - Air Conditioners (IEEJ-TERI)
 - ▶ Market analysis and simulation on abolition of Fuel Subsidies etc; (IEEJ-PDPU)
- **Capacity Building**
 - ▶ Held "Heat Pump Workshop" to deepen understanding and promote heat pump systems for energy efficiency with 60 participants including Govt. officials of India.
 - ▶ The country focused training course in Energy Conservation Techniques for Indian energy managers and energy auditors by JICA in Japan was conducted during February, 2015.
- **Industrial Energy Efficiency Programme**
 - ▶ Japan has most efficient sectors like Iron & Steel, Pulp & Paper, Aluminium, Refinery which are also covered under the PAT regime. The Government of Japan has facilitated in knowledge exchange of energy efficient practices adopted within these sectors

(iii) **India - US Collaboration**

Under Indo-US Energy dialogue, Ministry of Power is leading the Working Group on "Power and Energy Efficiency". The Indo- U.S. collaboration in power sector is mainly for deploying and transferring Innovative Clean Energy Technologies. Working Group (through Video Conference) meeting under Indo-US Energy Dialogue was held on 19th August, 2015.

The key instrument of the collaboration between India and U.S is the Partnership to Advance Clean Energy - Deployment (PACE-D) Programme. The areas covered under this programme are Industrial Efficiency, Building Energy Efficiency, Energy Efficiency Financing and Institutional strengthening.

- **Activities Undertaken**
- **Buildings**
 - ▶ Supported development of ECBC 2017 Technical Update. ECBC 2017 is a comprehensive code that builds in the concept of ECBC+ and Super ECBC to achieve Net Zero Energy by new commercial buildings.

- **Heating, Ventilation & Air Conditioning (HVAC)**
 - ▶ Completed a market assessment survey to understand the potential of large-scale deployment of energy efficient HVAC technologies in India.
 - ▶ Support has been provided for development of Indian Seasonal Energy Efficiency Ratio (ISEER).
 - **Energy Efficiency Financing & Capacity Building for Financing Institutions**
 - ▶ Training material and Energy Efficiency Financing Manuals for loan officers of Financial Institutions working on EE project financing with guidelines for financing EE projects was prepared jointly by BEE with USAID.
 - **Support for Policy & Regulatory Framework**
 - ▶ USAID has provided technical assistance to Haryana, Karnataka and Rajasthan States in preparing the EE state action plans.
- The tenure of the PACE-D programme has completed in December 2017.

(iv) India - UK

The Memorandum of Understanding (MoU) between India and the United Kingdom on cooperation in the energy sector was signed during the visit of Hon'ble Prime Minister of India to UK during November, 2015.

The areas of cooperation include the following:

- Market reforms, regulatory structures and the role of competition in the supply and distribution of electricity including regulations and incentives for Renewable Energy deployment.
- The integration of renewable energy into the grid.
- Energy efficiency policies and practice, including industrial energy efficiency and vehicular fuel efficiency.
- Off-shore wind energy and solar energy.
- Smart grids.
- Energy storage and new energy technologies.
- Capacity building of renewable energy institutions.
- Off-grid renewable energy services.
- Tidal energy.
- Any other area of co-operation approved in writing by the Participants.

The MoU provides framework for technical assistance, including in-kind grant, and other support, as mutually agreed, through relevant projects initiated by the United Kingdom. The MoU also encourage development of project specific agreements on time-to-time basis.

To Develop Programme of Action and oversee implementation of various activities, a Joint Working Group on Power and the Task Force on Energy Efficiency under it was constituted. First meeting of the Task Force was held on 20th September, 2017 at Bureau.

- **Activities Undertaken**

- ▶ **Industrial Energy Efficiency.**

Sharing of best practices through Knowledge Exchange Platform which facilitates industries to adapt new efficient technologies and global best practices. Establishment and Implementation of EE fund.

- ▶ **Implementation of Demand Side Management Action Plans of States.**

Development of DSM action plan for Andhra Pradesh, Maharashtra, Karnataka and Tamil Nadu

- ▶ **Contribution to Design and implementation of the Energy Efficiency Strategic Plan for India.**

Experience sharing by the UK with India to contribute to development of the Strategic Plan, drawing on UK's learnings from the Energy Efficiency Strategy, and the Carbon Budgeting Approach etc

(v) Indo-Switzerland

The Indo-Swiss Building Energy Efficiency Project (BEEP) is a bilateral cooperation between the Ministry of Power (MoP), Government of India and the Federal Department of Foreign Affairs (FDFA) of the Swiss Confederation. The Bureau of Energy Efficiency (BEE) is the Implementing agency on behalf of the MoP while the Swiss Agency for Development and Cooperation (SDC) is the agency on behalf of the FDFA. Consequent to the Cabinet Approval by the Govt. of India, a MoU for a five-year joint project with an overall objective to reduce energy consumption in new buildings in India was signed between the two governments on 8th November 2011 and was valid till 7th November 2016.

The successful implementation of the project during 2011-2016, resulted in the two governments agreeing to extend the MoU further for 5 years. The extension of the MoU for a follow-up phase of BEEP (8th November 2016 - 7th November 2021) was signed in the month of November 2016. The MoUs for the follow-up phase were exchanged at the BEEP International Conference in the presence of Shri Piyush Goyal, the then Minister of State (IC) for Power, Coal, New & Renewable Energy, Mines, Govt. of India.

- **Activities undertaken under the bilateral: -**

- ▶ Technical Assistance to builders and developers for Designing Energy Efficient Buildings through integrated design process. One of the project which has been provided this support is Smart GHAR project being constructed by Rajkot Municipal Corporation under Pradhan Mantri Awas

Yojna.

- ▶ Promotion of indigenous development and testing of prototypes
- ▶ Development of guidelines for design of energy efficient residential and public buildings.
- ▶ Knowledge dissemination & training: The project has contributed in creating awareness and developing technical capacities of key stakeholders through training programmes, seminars, web, etc. Specialized training and awareness modules have been developed. BEEP has conducted over 20 seminars and training programmes which were attended by more than 1500 participants.

B. Countries with whom cooperation is being revived

(i) India-China

Bureau of Energy Efficiency (BEE) is a part of the Working Group on Resource Conservation and Environmental Protection set up under the MoU between India and China in the field of energy efficiency signed on 26th November, 2012 for a period of five years. Bureau of Energy Efficiency (BEE) and National Development and Reform Commission (NDRC) agreed for the following.

Action points under the MoU :

- Cooperation in Enhancing Energy Efficiency in Industries (Cement, Paper and Steel) Considered as the major energy intensive industries with a very large bandwidth of energy consumption within the sectors, it provides a huge opportunity for savings through implementation of energy efficiency measures. To facilitate knowledge sharing between Indian and Chinese industries - Visit of representatives from the Indian Industry (Cement, Steel and Paper) to Beijing will be organized on the side lines of the third SED.
- Knowledge Sharing between India- Chinese ESCOs facilitated by a visit by Indian ESCOs to Beijing
- Technology exchange on increasing efficiency in Thermal Power Plants and to reduce pollutants.

The cooperation on energy efficiency will be taken up for further discussion during the 5th India China Strategic Energy Dialogue scheduled during April, 2018.

(ii) India-France

MoU was signed between Bureau of Energy Efficiency and French Environment and Energy Management Agency in May, 2006 for a period of three years and further extended by mutual interest for another 2 years. The achievements under

the MoU were as under:

- Energy Information Centers for creating awareness on energy efficiency have been established at State Designated Agencies of Haryana and Punjab.
- Demand Side Management Internet Portal has been successfully created and commissioned with assistance of ADEME and is available at www.bee-dsm.in.
- Sharing of Energy Efficiency Best practices and Best Available Technologies in MSMEs and Benchmarking and Mapping Indian MSMEs Energy Consumption

Extension of the MoU is to be revised in the current year. The draft MoU has been prepared and has been sent to Ministry of Power for approval.

(iii) India- Russia

MoU was signed between Bureau of Energy Efficiency and Russian Energy Agency in November, 2013 for exchange of knowledge, information and best practices on the following topics:

- Exchange of experience in the field of energy management, energy audits and energy services.
- Organization of conferences and seminars
- Technical assistance to the energy efficiency projects.
- Exchange of delegations

C. New Bilateral Cooperation

New collaborations are proposed between India and other countries such as Tanzania, Bulgaria, Uzbekistan, Czech Republic, Tajaksatan and South Korea in the areas of energy efficiency.

2.2 International Multilateral Programme

(i) International Partnership for Energy Efficiency Cooperation (IPEEC)

- The International Partnership for Energy Efficiency Cooperation (IPEEC) is a high-level international forum which includes developed and developing countries. Its purpose is to enhance global cooperation in the field of energy efficiency (EE) and to facilitate policies that yield energy efficiency gains across all sectors globally. Its foundation in May 2009 represents a key milestone in the improvement of energy efficiency. The IPEEC promotes energy efficiency worldwide by exchanging information related to energy efficiency, developing partnerships between energy efficiency sectors and supporting energy efficient initiatives. IPEEC

supported initiatives are open to both member and non-member nations as well as the private sector.

- Objective of IPEEC is to enhance global cooperation in the field of energy efficiency. IPEEC members include 16 countries namely Australia, Brazil, Canada, China, the European Union, France, Germany, India, Italy, Japan, Mexico, the Russian Federation, South Africa, South Korea, the United Kingdom, and the United States. The visibility of IPEEC has significantly enhanced with the announcement of the G20 Energy Efficiency Action Plan. India is participating in the four work streams viz. Energy Efficiency Financing, Industrial Energy Management, Transport and Electricity Generation. The Partnership relies on voluntary contributions (VCs) of IPEEC members and other entities. These VCs include financial as well as in-kind contributions.
- IPEEC's technical work program spans several sectors. Member countries lead and participate in dedicated Task Groups that design and implement the IPEEC's technical work program. The Task Groups are funded directly by their participating members.
- The IPEEC is run by an Executive Committee (ExCo), a Policy Committee (PoCo) and a Secretariat. Both the Executive Committee (Canada as current Chair) and the Policy Committee (USA as current Chair) provide overall guidance on administrative, policy and technical issues. They are made up of representatives of the IPEEC members, India is one of the Vice-Chairs of ExCo as well as PoCo.
- The Executive Committee examines and adopts the proposals of the member countries and the budget for each year, examines membership requests, provides guidance and oversight to the Secretariat and develops proposals for the Task Groups while reviewing some of the Task Groups' work.
- The Policy Committee governs the overall framework and policies of the IPEEC, follows the progress of the Task Groups as well as the work of the Executive Committee and the Secretariat. So far 13 meetings of Policy Committee meetings have been held with the last meeting convened on 16th and 17th February, 2017.
- The Secretariat, working under its Executive Director, is the coordinator of the IPEEC's communications outreach and activities. Its administrative functions include the organization of the meetings of the Policy Committee and the Executive Committee, the screening and forwarding of membership requests to the Executive Committee, and the coordination of IPEEC information (status, activities), IPEEC's technical work programme

spans several sectors. Member countries lead and participate in dedicated Task Groups that design and implement the IPEEC's technical work programme. The Secretariat leads two additional technical initiatives. The Task Groups are funded directly by their participating members.

(ii) Clean Energy Ministerial (CEM)

- The Clean Energy Ministerial (CEM) is a high-level global forum to share lessons learnt and best practices, and to encourage the transition to a global clean energy economy. Initiatives are based on areas of common interest among participating governments and other stakeholders. During the United Nations Framework Convention on Climate Change conference in Copenhagen in December 2009, U.S. Secretary of Energy announced to host the first Clean Energy Ministerial to bring together ministers with responsibility for clean energy technologies from the world's major economies and ministers from a select number of smaller countries that are leading in various areas of clean energy.
- The Clean Energy Ministerial (CEM) presently has 23 countries and the European Commission. The countries are Australia, Brazil, Canada, China, Denmark, Finland, France, Germany, India, Indonesia, Italy, Japan, Korea, Mexico, Norway, Russia, Saudi Arabia, South Africa, Spain, Sweden, United Arab Emirates, United Kingdom and United States. Members of the Clean Energy Ministerial (as of 2016) represent about 90% of global clean energy investment and 75% of the world's greenhouse gas emissions. The CEM is currently the only regular meeting of energy ministers focused exclusively on clean energy.
- In this regard, Ministry of Power has mandated Bureau of Energy Efficiency to participate in the CEM Initiatives mandated with a long term vision namely Appliances (SEAD) as the LEAD country, Electric Vehicles & Energy Management Working Group (EMWG) and CEM Campaigns mandated to achieve a goal within a stipulated time frame namely Advanced Cooling challenge & Global Lighting challenge (GLC) as the LEAD country along with EV@30@30 campaign.

FORM OF FINANCIAL STATEMENTS (NON-PROFIT ORGANISATION)
Name of Entity BUREAU OF ENERGY EFFICIENCY

SCHEDULES FORMING PART OF THE ACCOUNTS
FOR THE YEAR ENDED 31st MARCH, 2018

SCHEDULE 24 - SIGNIFICANT ACCOUNTING POLICIES

1) ACCOUNTING CONVENTION

The financial statements are prepared under the historical cost convention and on the accrual method of accounting, unless otherwise stated.

2) INVENTORIES

Inventories are valued at Cost.

3) INVESTMENTS

Investments are carried at cost.

4) FIXED ASSETS

a.Fixed assets are stated at cost of acquisition inclusive of inward freight, duties and taxes and incidental and direct expenses in related to acquisition.

b.Fixed Assets received by way of non-monetary grants (other than Corpus Fund) are capitalized at values stated, by corresponding credit to Capital Reserve.

c.Fixed Assets representing Grant-in-Kind are reduced by an amount of depreciation provided during the year on such assets and a corresponding reduction in Capital Reserve created on account of Grant-in Kind is made.

5) DEPRECIATION

a. Depreciation on Fixed assets is computed on written down value except on unserviceable items in accordance with the rate prescribed in the Income Tax Act, 1961.

b. In respect of additions to/deductions from fixed assets during the year, depreciation is considered on pro-rata basis as under:-

Assets acquired/put to use for up to 180 days = Depreciation for six months

Assets acquired/put to use for more than 180 days = Depreciation for full year

c. Assets costing Rs.5,000/- or less each are fully provided.

d. Depreciation is segregated into Fixed Assets and Fixed Assets representing Grant-in-Kind.

e. Depreciation has not been provided on unserviceable assets.

6) ACCOUNTING FOR GRANTS AND REVENUE

Grants and Revenue including labeling fee received under Standard & Labeling Scheme are accounted for on the receipt basis except interest income.

7) GOVERNMENT and OTHER GRANTS/SUBSIDIES

- a. Government grants of the nature of contribution towards capital cost of setting up projects are treated as Capital Reserve.
- b. Grant-in-Kind received in the form of Fixed Assets is shown under Capital Reserve net of depreciation provided on such assets.
- c. Government and Other grants/subsidy are accounted on realization basis and are shown as Income under Grants received from Central Government.
- d. Expenditure incurred under various Schemes against Grants received from Ministry of Power, Government of India is accounted for in the year of release.

8) FOREIGN CURRENCY TRANSACTIONS

- a. Transactions denominated in foreign currency are accounted at the exchange rate prevailing at the date of transaction.
- b. Current assets, foreign currency loans and current liabilities are converted at the exchange rate prevailing as at the year-end and the resultant gain / loss is adjusted to cost under relevant Projects.

9) LEASE

Lease rentals are expensed with reference to lease terms.

10) RETIREMENT BENEFITS

- a. The Bureau has taken the Gratuity Policy with LIC of India for Liability towards gratuity payable on death/retirement of its employees.
- b. The Bureau has taken the Leave Encashment benefit Policy of LIC of India for Liability towards Leave Encashment benefit of its employees.

FORM OF FINANCIAL STATEMENTS (NON-PROFIT ORGANISATION)

Name of Entity **BUREAU OF ENERGY EFFICIENCY**

SCHEDULES FORMING PART OF THE ACCOUNTS FOR THE YEAR ENDED 31st MARCH, 2018

SCHEDULE 25 - NOTES ON ACCOUNTS

1) CONTINGENT LIABILITIES

Service Tax

Disputed demands in respect of Service Tax:

- i. 2013 to 2014- ₹3,81,15,783/- (Previous year - ₹3,81,15,783/-)
- ii. 2014 to 2015- ₹2,95,70,890/- (Previous year - ₹2,95,70,890/-)
- iii. 2015 to 2016- ₹3,63,62,695/- (Previous year - NIL)

BEE filed appeal/reply to Customs Excise & Service Tax Appellate Tribunal (CESTAT) against the demand of ₹8,15,59,473/- for the financial year 2008 to 2013. The Appellate Tribunal has allowed the appeal in our favour vide final order No. 50937/2018 decision dated 27/2/2018 and accordingly, the demand for the period has been dropped. Consequent upon the Tribunal order, BEE is in process of requesting the department for refund of the amount of ₹61,16,960/- which was initially deposited at the filing of appeal.

Keeping in view the above Tribunal decision, BEE is in process to pursue the department to exempt BEE from service tax demand for the subsequent financial year.

2) CURRENT ASSETS, LOANS AND ADVANCES

In the opinion of the Management, the current assets, loans and advances have a value on realization in the ordinary course of transaction, equal at least to the aggregate amount shown in the Balance Sheet.

3) TAXATION

Section 49 of The Energy Conservation Act, 2001, Exemption from tax on Income provides - "Notwithstanding anything contained in the Income Tax Act, 1961 (43 of 1961) or any other enactment for the time being in force relating to the tax on Income, profit or gains -

(a) The Bureau;

(b) The existing Energy Management Centre from the date of its constitution to the date of establishment of the Bureau,

shall not be liable to pay any income-tax or any tax in respect of their income, profits or gains derived".

In accordance with the above, there is no taxable Income of the Bureau under Income Tax Act 1961 and, therefore no provision for Income Tax has been considered.

4) **FOREIGN CURRENCY TRANSACTIONS**

The Bureau has incurred the foreign currency expenditure on account of Annual Contribution to IPEEC and foreign travelling expenditure for projects.

The Bureau has received USD 18,99,985 as Grant under “UNIDO-GEF-BEE PROJECT” in the Financial Year 2012-13. Out of this, the balance USD 7,28,740 is kept with our banker i.e., Vijaya Bank in a Separate Foreign Currency Bank Account. As on the closing date of Balance Sheet, the USD 7,28,740 are valued at ₹4,71,85,915/- (Previous year - ₹4,71,20,328/-). The effect of Exchange rate variation of ₹65,587/- has been shown in “Other Additions/Rate difference” under “Additions to the Funds” in Schedule-3 (Earmarked Funds - Others) under “UNIDO-GEF-BEE PROJECT”.

5) **RETIREMENT BENEFITS**

The Bureau has booked expenditure of ₹10,455/- towards premium paid to LIC of India on account of Gratuity and ₹24,35,586/- on account of Leave Encashment Benefits for regular employees of BEE and NMEEE. Since, BEE maintains Gratuity/Leave encashment of its employees through LIC (a Government Body), LIC does the actuarial valuation for the employees of BEE. As per the certificates issued by the LIC, the actuarial value of the Gratuity fund and Group Leave Encashment Scheme as on 31/3/2018 are as follows:-

- i. Gratuity fund - ₹71,57,070/- (Previous year - ₹76,48,392/-)
 - ii. Group Leave Encashment Schemes - ₹70,22,033/- (Previous year - ₹46,94,802/-)
- 6) Bureau has earned interest income on sweep accounts with bank in respect of unutilized funds of various government schemes. Hence, Interest income calculated on the unutilized fund on the basis of monthly average balance has been credited to respective schemes out of the Interest Income received and the same is being returned to Ministry of Power.
 - 7) Bureau has shown under Earmarked Fund (Schedule-I) ₹1,05,65,32,747/- (Previous year - ₹1,00,49,69,872/-) (Including interest earned during the year) under PRGFEE and ₹44,23,99,937/- (Previous year - ₹42,08,65,581/-) under VCFEE (Including interest earned during the year). The same has been deposited with Vijaya Bank in Separate accounts and shown in (Schedule-9).
 - 8) During the year an amount of ₹53,78,36,007/- (Schedule-1) including interest (Previous year - ₹46,48,36,681/-) has been received by the Bureau through the implementation of Standard & Labeling Programme under clauses (a), (b) and (d) of Section 14 of the EC Act. Bureau considered the labeling fee under Standard & Labeling Programme (S&L) on receipt basis to maintain the uniformity.
 - 9) The Standard & Labelling Programme proposed for 12th Plan was approved during the financial year 2014-15. In the EFC Meeting, it was decided that all expenditure pertaining to the scheme to be borne out of income generated in the scheme i.e., “Energy Conservation Fund”. Accordingly, an amount of ₹13.62 crore (Previous year -

₹12.22 crore) was transferred from Energy Conservation Fund" (Shedule-1) to Schedule-3 to meet the expenditure of the Scheme during the year.

- 10)** During the year, under PAT Cycle-I, the Scheme of E-Certs (Energy Saving Certificates) trading has been introduced vide Central Electricity Regulatory Commission Notification No. L-1/97/2016 dated 27/5/2016. Under the Scheme, BEE acts as Administrator of the Scheme and POSOCO acts as Registry. POSOCO will collect all fee and charges from eligible entities and will maintain all books of accounts for the same. POSOCO will share fee and charges in the ratio of 50:50 between the Registry and the Administrator.

Under this initiative, BEE has received an amount of Rs.94,93,460/- from POSOCO towards fee and registration charges. The eligible entities have deducted TDS amounting to Rs.4,25,715/- on the same.

- 11)** Check Testing Equipments amounting to ₹52,26,251/- (Previous Year ₹52,26,251/-) under Standard & Labeling Programme (S&L) have been shown as Current Assets, which are lying with third party (Test Labs) at different locations. These inventories are under the Standard & Labelling Programme and not for trade purpose. Product wise details of Check testing equipments as on 31/3/2018 are as follows:-

i.	Refrigerators	- ₹ 15,42,413/-
ii.	Air conditioners	- ₹ 18,20,895/-
iii.	Water Heaters	- ₹ 3,88,371/-
iv.	Pump Set	- ₹ 9,42,341/-
v.	Induction Motors	- ₹ 3,58,682/-
vi.	Television	- ₹ 1,52,912/-
vii.	Tubular Fluorescent Lamp	- ₹ 20,637/-
	Total	- ₹ 52,26,251/-

- 12)** No depreciation has been charged on un-serviceable items which are included in the fixed assets.

- 13)** Bureau of Energy Efficiency (BEE) is jointly executing a GEF funded project (Financing Energy Efficiency at MSMEs) with SIDBI. The implementing agency for the project is World Bank. The project started in September, 2010 with project completion date as December 30, 2014. The project was restructured by World Bank in December, 2014. Under the scheme of restructuring, the project was extended for another 2 years i.e., upto December 30, 2016.

In November 2016, the project has been awarded an additional GEF grant of USD 5.19 million with a time extension till May 4, 2019. Allocation of budget for BEE under additional funding is USD 1.42 million.

An amount of ₹9.43 crore has been spent by BEE till 31st March 2018. This includes an amount of ₹0.97 crore spent during the financial year 2017-18.

- 14) Bid Processing fees and RTI fee ₹4,03,345/- (Previous year - ₹5,10,965/-) has been shown as "Fees for Miscellaneous Services" under the Schedule-18 - Other Income.
- 15) During the year Bureau has booked the following expenses which are related to previous year (Prior Period Expenditure)
- | | | | |
|------|---|-----|---------------------|
| i. | Office Maintenance | - ₹ | 58,574/- |
| ii. | Professional Charges | - ₹ | 9,000/- |
| iii. | Printing & Stationery (Subscription Expenses) | - ₹ | 1,177/- |
| iv. | Telephone Expenses | - ₹ | 45,710/- |
| v. | Travel Expenses | - ₹ | 420/- |
| | Total | - | ₹ 1,14,881/- |
- 16) Provision for the pay & allowances for the month of March, 2018 has not been made in the accounts for regular employees of BEE and NMEEE, as the same is payable in the next year.
- DA arrears for the month of January to March, 2018 has not been provided in the books of accounts as the same is paid in the next year with reference to O.M.No.1/1/2018-E-II(B) dated 15/3/2018 of Ministry of Finance, Department of Expenditure.
- 17) Corresponding figures for the previous year have been re-grouped/re-arranged, wherever necessary.
- 18) Schedules 1 to 25 are annexed to and form an integral part of the Balance Sheet as at 31st March, 2018 and the Income and Expenditure Account for the year ended on that date.

4

Administration

- 4.1 Grievance Redressed
- 4.2 Right to Information Act
- 4.3 Welfare of SC/ST/OBC
- 4.4 Welfare of Minorities
- 4.5 Implementation of Official Language
- 4.6 Vigilance
- 4.7 Welfare of persons with Disabilities
- 4.8 Miscellaneous

4.1 Grievance Redressed

There is no separate Grievance Redressal Cell in Bureau of Energy Efficiency. Grievances, received are being dealt by the administration Section of BEE. All the grievances received were attended/replied promptly.

4.2 Right to Information Act

During the year 2017-18, in all 86 application seeking information under RTI Act were received in BEE and all of these were replied to/transferred within the admissible time limit.

During the same period 03 appeals were also received by the Appellate Authorities, which were also disposed off within admissible time limit.

4.3 Welfare of SC/ST/OBC

Representation of SC/ST/OBC in the Bureau of Energy Efficiency is indicated in proforma given below:-

Group	Total Employees as on 31.03.2018	Representation					
		SCs	SC%	STs	ST%	OBC	OBC%
A	11	01	9.09%	-	-	-	-
B	08	-	-	-	-	-	-
C	01	-	-	-	-	-	-
D	-	-	-	-	-	-	-
Total	20	01	5%	-	-	-	-

4.4 Welfare of Minorities

Representation of Minorities in the Bureau of Energy Efficiency is indicated in proforma given below:-

Group	Total Employees as on 31.03.2018	Representation of Minorities	Percentage of Minorities
A	11	-	-
B	08	-	-
C	01	-	-
D	-	-	-
Total	20	-	-

4.5 Implementation of Official Language

For the purpose of creating awareness towards progressive use of Hindi in official work, every year in the month of September, Hindi Pakhwara is observed in the Bureau of Energy Efficiency. During the year, various Hindi competitions and Hindi workshops etc. were organized to encourage and incentivize the officers/employees for doing their more and more official work in Hindi as per the rules under the Official Language Act.

Hindi Pakhwara was organized in BEE during 14-28 September 2017. During the Pakhwara, seven competitions namely, Essay competition, Noting & Drafting competition, Dictation for officers & staff, Hindi Dictation competition for Class-IV employees and competition in General Knowledge regarding use of official language Hindi, Hindi Poem Recitation and Slogan competition on energy efficiency were organized. Eight prizes viz. first prize, second prize, third prize and Five consolation prizes were given to the winners of the competitions. Certificates and prizes were distributed in the closing ceremony of Hindi Pakhwara by Director General (BEE).

Hindi workshops were held on 07 June, 2017, 27 September, 2017, 29 December, 2017 and 23 March, 2018 each for two hours with participation of 24, 20, 22, 14 participants respectively. Deep knowledge and experiences of the Expert Guest Speakers was useful as they have not only shared their views and knowledge but also helped to solve the problems being faced by the participants in doing their day to day official work in Hindi as per the requirements of the Official Language Act. Participation in these workshops had helped enormously in increasing the use of Hindi in the official work. After participating in these workshops employees had started typing notes through Unicode in Hindi in the files. No. of letters sent to 'A' & 'B' regions in Hindi are increasing in each quarter. Besides this, Quarterly meetings to review the progressive use of Hindi were held regularly under the Chairmanship of Director General (BEE).

4.6 Vigilance

During the year 2017-18, there were no major complaints received and no disciplinary case initiated. Monthly Report on Review of the Mechanism to ensure probity is submitted regularly to Ministry of Power

4.7 Welfare of persons with Disabilities

Representation of physically Challenged Employees in the Bureau of Energy Efficiency is indicated in the format given below:-

Group	Total Employees as on 31.03.2018	Physically Challenged Employees				Percentage of Physically Challenged employees
		VH	HH	OH	Total	
A	11	-	-	-	-	-
B	08	-	-	01	-	12.5%
C	01	-	-	-	-	-
D	-	-	-	-	-	-
Total	20	-	-	01		5%

4.8. Miscellaneous

The Service Rules for the Bureau were notified by the Government to regulate their service and recruitment conditions under Section 10(2) of the Energy Conservation Act, 2001. The following two notifications were published in the Gazette of India:-

- i) GSR1041(E) dated the 21st August, 2017 - The Bureau of Energy Efficiency (Terms and Conditions of Service of Employees) Rules, 2017
- ii) GSR1125(E) dated the 31st August, 2017 - The Bureau of Energy Efficiency (Recruitment, Appointment, and Terms and Conditions of Service of Officers and other Employees) Rules, 2017

The notification of these rules by the Government paved the way for promotion and other benefits to the employees of the Bureau. The Bureau promoted two of its officers working as Joint Director to the Grade of Director after the issuing of these Rules and also had advertised the vacant posts of Joint Director to strengthen the organization.

BUREAU OF ENERGY EFFICIENCY (BEE)
