Message from the Director General, BEE

This quarter has been one of achievement, engagement, and inspiration for the Bureau of Energy Efficiency. From the successful national launch of the ADEETIE Scheme in Panipat to the establishment of Maharashtra's first Energy Management Centre in Kolhapur, BEE has continued to translate policy into impact and vision into action.

Each initiative showcased in this issue reflects the Bureau's expanding reach—from catalysing MSME transformation to enabling sustainable buildings, from recognizing the invaluable contributions of Accredited Energy Auditors to advancing dialogues on carbon markets and climate

finance. Together, these efforts are helping to build the foundation of an energy-efficient and low-carbon India.

Our participation in national platforms like the "Transforming India 2025" Expo and observances such as Swachhta Pakhwada and Hindi Pakhwada further demonstrate BEE's commitment not only to energy conservation but also to national values of cleanliness, inclusivity, and linguistic unity. Through collaboration, innovation, and awareness, we can together shape an energy-secure and sustainable future for generations to come.

Message from the
SECRETARY, BEE

It gives me immense pleasure to extend my greetings to all readers of this edition of BEE LINE. The past quarter has been a remarkable period of progress and partnership in India's energy efficiency journey. The national launch of the ADEETIE Scheme marks a defining milestone in our collective pursuit of sustainable industrial growth. With its focus on empowering MSMEs through affordable financing and advanced technologies, ADEETIE represents not only an industrial transformation but also a vision of equitable green growth.

The Bureau of Energy Efficiency has continued to demonstrate exemplary leadership through initiatives such as the State Energy Efficiency Index (SEEI) 2024, which highlights the growing momentum of state-level actions in

achieving India's climate commitments. The regional workshops on the Energy Conservation and Sustainable Building Code (ECSBC), held across Gujarat and Kerala, have further strengthened our resolve to make India's infrastructure both energy-efficient and climate-resilient.

As we move closer to the national goal of Net Zero by 2070, it is heartening to see diverse stakeholders—industry, academia, and civil society—working together to make energy efficiency a cornerstone of development. The Bureau of Energy Efficiency remains deeply committed to enabling this transition through policies that empower people, promote innovation, and sustain growth in harmony with nature.

ADEETIE Scheme Officially Launched: A Push for Industrial Energy Efficiency

Panipat, Haryana | July 15, 2025 – In a landmark step toward India's green industrial transition, the Ministry of Power rolled out the Assistance in Deploying Energy Efficient Technologies in Industries & Establishments (ADEETIE) scheme. The national launch took place at Arya (P.G.) College, Panipat, Haryana, and was graced by Hon'ble Union Minister for Power and Housing & Urban Affairs, Shri Manohar Lal.

With a budgetary outlay of ₹1000 crore, ADEETIE is a flagship initiative of the Ministry of Power, implemented by the Bureau of Energy Efficiency (BEE). The scheme is designed to revolutionize the Micro, Small, and Medium Enterprises (MSMEs) sector by equipping them with advanced energy-efficient technologies and practices—laying the foundation for a low-carbon, high-efficiency industrial ecosystem.

Scheme Highlights

- **Financial Support:** Interest subvention of 5% for Micro & Small Enterprises and 3% for Medium Enterprises.
- **Technical Handholding:** Includes Investment Grade Energy Audits, Detailed Project Reports (DPRs), technology identification, and Monitoring & Verification (M&V).
- **Target Sectors & Coverage:** 14 energy-intensive sectors across 160 MSME clusters, to be covered in a phased manner from FY 2025–26 to FY 2027–28.
- **Investment Mobilization:** Aims to catalyze ₹9000 crore in clean tech investments, with ₹6750 crore expected from MSME lending.

Hon'ble Union Minister Shri Manohar Lal inaugurates the ADEETIE Scheme in Panipat.

National Launch Highlights

The launch witnessed enthusiastic participation from MSMEs, industry bodies, and technology partners.

- Hon'ble Union Minister Shri Manohar Lal inaugurated the scheme, launched the official portal (adeetie.beeindia.gov.in) and brochure, and called ADEETIE a transformative step for MSMEs to enhance global competitiveness through sustainability.
- Shri Pankaj Agarwal, Secretary, Ministry of Power, praised BEE's efforts in expanding access to energy efficiency and financing.
- Shri A.K. Singh, Additional Chief Secretary (Energy), Haryana, urged MSMEs to adopt clean technologies.
- Shri Akash Tripathi, Additional Secretary, Ministry of Power & DG, BEE, highlighted

ADEETIE's potential to catalyze ₹9000 crore in green investments.

- Other dignitaries, including Shri Krishna Lal Panwar and Smt. Priyanka Soni from the Government of Haryana, expressed strong support for MSME transformation.

Green Growth for a Greener Bharat

The roll-out of ADEETIE marks a significant milestone in India's energy efficiency journey. By enabling MSMEs to transform operations, reduce carbon emissions, and enhance competitiveness, the scheme aligns with India's Nationally Determined Contributions (NDCs) and the national target of achieving Net Zero by 2070. This initiative stands as a powerful testament to India's commitment to green growth and sustainable industrial development.

ADEETIE Cluster-Level Workshop Held in West Bengal

Kolkata, West Bengal | July 4, 2025 – A one-day cluster-level workshop under the Assistance in Deploying Energy Efficient Technologies in Industries & Establishments (ADEETIE) scheme was successfully conducted by the West Bengal State Designated Agency (WBSDA) in collaboration with the Bureau of Energy Efficiency (BEE), Ministry of Power, Government of India. The event aimed to raise awareness and promote adoption of energy-efficient technologies while highlighting the technical and financial support available to MSMEs under the ADEETIE scheme.

Stakeholders and MSME representatives
 at the ADEETIE Cluster-Level Workshop in Kolkata.

Workshop Highlights

- Inaugural Session: Senior officials from WBSDA, the Council for Leather Exports (CLE), and BEE addressed participants, stressing the importance of energy efficiency in boosting MSME competitiveness and supporting India's low-carbon growth agenda.
- Technical Discussions:

- Shri Pradeep Dhingra, Director, PGSEPL delivered a detailed presentation on energy efficiency best practices and decarbonization strategies, focusing on MSME foundry clusters.
- Dr. Sanjay Chakraborty, Professor, Government College of Engineering and Leather Technology, shared insights on emerging technologies in the leather sector, showcasing innovations that can significantly cut energy consumption and environmental impact in processing units.

Stakeholder Engagement

The workshop attracted over 100 stakeholders, including MSME unit owners from the Howrah and Kolkata clusters, technology providers, and representatives from financial institutions.

Participants engaged in interactive discussions and expressed strong interest in leveraging ADEETIE support to upgrade operations, adopt clean technologies, and improve competitiveness.

Driving MSME Transformation

The West Bengal workshop reaffirmed the ADEETIE scheme's role as a catalyst for industrial decarbonization. By bringing MSMEs, experts, and financial partners together, the initiative is enabling clusters to transition toward energy efficiency, sustainability, and green growth.

Exploring New Avenues for Energy Efficiency Collaboration

Durgapur, West Bengal | July 18, 2025 – A team of officials from the Bureau of Energy Efficiency (BEE) visited the CSIR-Central Mechanical Engineering Research Institute (CMERI) to explore collaborative opportunities in advancing energy management and sustainability.

Key Discussions

The visit created a platform for constructive dialogue on potential joint initiatives, focusing on:

- Energy efficiency innovations
- Technology deployment and scaling
- Research-driven partnerships

Both BEE and CMERI expressed keen interest in combining their institutional strengths to deliver scalable, impactful solutions that directly contribute to India's energy conservation and climate goals.

Strengthening Science–Policy Partnerships

This engagement highlights the growing importance of science-policy collaboration in addressing India's energy transition. By aligning research expertise with policy implementation, the partnership aims to promote sustainable industrial practices and accelerate the adoption of energy-saving technologies across sectors.

BEE officials visiting CSIR-CMERI to explore joint research on energy efficiency.

BEE Felicitates Accredited Energy Auditors for Their Role in Advancing Energy Efficiency

New Delhi | July 23, 2025 – The Bureau of Energy Efficiency (BEE) organized a felicitation ceremony at AITDC (UTPRERAK), NPTI, Badarpur, to honour the invaluable contribution of Accredited Energy Auditors (AEAs) to India's energy efficiency movement.

Recognizing Technical Excellence

The event celebrated the tireless efforts of AEAs in delivering impactful energy-saving interventions across industries and establishments. As frontline technical experts and field practitioners, AEAs continue to play a pivotal role in the successful implementation of energy efficiency programmes nationwide.

Knowledge Sharing and Insights

The half-day programme featured interactive sessions where AEAs:

- Shared on-ground experiences and success stories
- Presented case studies demonstrating measurable energy savings
- Highlighted sectoral challenges and innovative solutions

These discussions provided valuable insights into practical strategies for advancing industrial sustainability and strengthening India's clean energy transition.

Commitment to Sustainability

BEE expressed deep appreciation for the dedication and expertise of AEAs, acknowledging their central role in supporting the mission of reducing the energy intensity of the Indian economy. The event also underscored the importance of continuous engagement with domain experts to build an energy-resilient, efficient, and environmentally responsible industrial landscape.

BEE honours Accredited Energy Auditors for their contribution to advancing energy efficiency.

Regional Workshop on ECSBC Implementation Held in Gandhinagar

Gandhinagar, Gujarat | July 24–25, 2025 – The Bureau of Energy Efficiency (BEE), in collaboration with the Gujarat Energy Development Agency (GEDA), successfully organized a Regional Workshop for the Western Region on the implementation of the Energy Conservation and Sustainable Building Code (ECSBC).

The two-day workshop served as a vital platform to:

- Review ECSBC implementation progress across Western states
- Facilitate knowledge sharing among stakeholders

- Coordinate regional actions for advancing sustainable construction practices

With India striving to reduce energy intensity and expand green infrastructure, the workshop emphasized the urgency of integrating climate-responsive building practices across the construction sector.

Both BEE and GEDA highlighted the importance of regional collaboration in achieving India's energy conservation goals and advancing the national commitment toward Net Zero by 2070. The workshop reaffirmed the role of state-level partnerships and coordinated strategies in promoting sustainable, energy-efficient, and resilient infrastructure across the Western region.

Participants at the Western Regional Workshop on ECSBC implementation in Gandhinagar.

Southern Regional Workshop on ECSBC Held in Thiruvananthapuram

Thiruvananthapuram, Kerala | August 14–15, 2025 – The Southern Regional Workshop on Energy Conservation and Sustainable Building Construction (ECSBC) brought together policymakers, experts, and stakeholders to deliberate on sustainable building practices and energy efficiency measures.

Organized by the Bureau of Energy Efficiency (BEE) in collaboration with the Energy Management Centre (EMC), Kerala, the two-day workshop served as a key platform for advancing regional cooperation in sustainable construction.

Inaugural Highlights

- The event was inaugurated online by Sh. K. Krishnankutty, Hon'ble Minister for Electricity, Government of Kerala, who lauded Kerala's leadership in energy conservation. He highlighted the notification of the Kerala Energy Conservation and Sustainable Building Code Rules, 2025 (KECSBCR) as a milestone in strengthening sustainable construction practices.
- A special video message was delivered by Sh. Puneet Kumar, IAS, Additional Chief

Secretary (Power), Government of Kerala, stressing the need for effective code implementation, resource mobilization, and cooperation among stakeholders.

Workshop Focus

With active participation from over 60 representatives across Andhra Pradesh, Kerala, Telangana, Tamil Nadu, Karnataka, Puducherry, Lakshadweep, Andaman & Nicobar Islands, Goa, and Delhi, the workshop discussions centred on:

- Implementation of ECSBC codes
- Mobilizing resources for green construction
- Sharing best practices among states and UTs

The workshop provided a valuable knowledge exchange platform, reinforcing the collective mission to integrate sustainable building practices into India's energy conservation framework. By fostering collaboration across Southern states and UTs, the event strengthened regional momentum for achieving India's energy efficiency goals and Net Zero commitments.

Inaugural session of the Southern Regional ECSBC Workshop in Kerala.

Secretary, BEE, Shri Milind Deore Inaugurates FAN Summit & Exhibition 2025

Greater Noida, Uttar Pradesh | August 21-23, 2025 – The first-of-its-kind FAN Summit & Exhibition 2025 was successfully organized at India Expo Mart, Greater Noida, showcasing the transformative role of innovation and energy efficiency in shaping the future of India's vital fan industry.

The summit was inaugurated by Shri Milind Deore, Secretary, Bureau of Energy Efficiency (BEE), who emphasized the importance of sustainable cooling solutions and industry transformation in India's energy efficiency journey.

Exhibition Highlights

Over the three days, the event witnessed active participation from 120+ exhibitors and industry stakeholders across India. The exhibition featured:

- Complete fan ecosystem – from traditional ceiling and exhaust fans to BLDC motors, smart controllers, and designer models
- Technology partners – including die-casting experts, semiconductor providers, and innovators in smart cooling products
- Interactive platforms – enabling

engagement between manufacturers, innovators, policymakers, and end-users

Driving Sustainable Cooling Solutions

The FAN Summit & Exhibition 2025 highlighted the growing importance of energy-efficient technologies within India's cooling and fan industry, a sector crucial to everyday comfort and national energy conservation. By fostering industry-wide collaboration, the summit reinforced the role of technology, policy, and market partnerships in accelerating the shift toward smarter, greener cooling solutions.

The event underscored how industry forums of this scale contribute to India's developmental vision of Viksit Bharat 2047 and long-term commitment to achieving Net Zero by 2070.

Secretary, BEE, Shri Milind Deore, inaugurating the FAN Summit & Exhibition.

BEE Showcases Energy Efficiency Initiatives at 'Transforming India 2025' Expo

New Delhi | 24-26 August 2025 – The Bureau of Energy Efficiency (BEE) participated in the three-day “Transforming India 2025” Expo at Bharat Mandapam, New Delhi, highlighting its pivotal role in advancing India's energy transition. The BEE stall served as a dynamic platform to showcase flagship schemes, innovative programs, and sustainable practices that are shaping the nation's journey towards Viksit Bharat 2047 and Net Zero 2070.

Day One: Dignitaries at the BEE Stall

The inaugural day witnessed enthusiastic public participation with visitors showing keen interest in BEE's initiatives. Two distinguished guests added significance to the day:

- Shri Indrasena Reddy Nallu, Hon'ble Governor of Tripura, visited the stall, appreciated BEE's cross-sectoral programs, and lauded its role in promoting energy efficiency.
- Acharya Balkrishna, Managing Director, Patanjali Ayurved, also visited and encouraged citizens to adopt energy-conscious and sustainable lifestyles.

These visits further motivated BEE's team and amplified the impact of its outreach efforts.

Day Two: Engaging Citizens through Activities

The second day of the expo saw continued high engagement with a focus on:

- Sustainable building practices
- Energy-efficient appliances
- Industrial efficiency and demand-side management

Interactive activities like an energy conservation quiz and the energy pledge drew strong participation, especially from students and young professionals. These fun yet educational interactions deepened awareness and inspired simple lifestyle changes to conserve energy.

Day Three: Collective Action for a Greener Future

The final day, 26 August, brought even larger public participation. Citizens from diverse backgrounds visited the stall, interacted with exhibits, and joined the energy conservation pledge in large numbers. The vibrant atmosphere reflected a growing national consciousness about energy efficiency and the importance of collective action in building a greener India.

Key Takeaway

BEE's participation in the "Transforming India 2025" Expo was an impactful opportunity to:

- Showcase flagship initiatives across sectors
- Connect with policymakers, industry leaders, and the public
- Inspire citizens to adopt energy-efficient practices

The enthusiastic response, dignitary appreciation, and active citizen involvement reaffirm BEE's commitment to fostering innovation, awareness, and sustainable practices for India's energy-secure future.

Visitors at the BEE stall engaging with exhibits on sustainable energy solutions.

Inauguration of Maharashtra's First Energy Management Centre at Kolhapur

Kolhapur | 22 August 2025 – Maharashtra took a major stride in advancing industrial energy efficiency with the inauguration of the state's first Energy Management Centre at the Kolhapur Foundry & Engineering Cluster's Centre of Excellence. The centre was inaugurated by Shri Milind Deore, Secretary, Bureau of Energy Efficiency (BEE), marking a landmark initiative in India's journey towards a low-carbon and energy-secure economy.

A Hub for Industrial Energy Efficiency

The Energy Management Centre is designed to provide industries with:

- Advanced energy audits for identifying efficiency opportunities
- Capacity-building programs to upskill industry professionals
- Digital solutions enabling 15–20% energy savings across sectors

Target industries include foundry, engineering, sugar, textiles, and healthcare, making the centre a multi-sectoral hub of innovation and knowledge-sharing.

Boosting MSME Transition through ADEETIE

A key focus of the centre will be to support industries in adopting energy-efficient technologies under the Assistance in Deploying of Energy Efficient Technologies in Industries and Establishments (ADEETIE) Scheme.

- MSMEs will receive technical guidance and financial support
- This will ease the adoption of cutting-edge technologies
- Ensuring smoother transitions toward sustainability

Shri Milind Deore inaugurates Maharashtra's first Energy Management Centre at Kolhapur.

Aligning with National Missions

The initiative strengthens both industrial competitiveness and India's national development vision:

- Supports Viksit Bharat @ 2047 by driving innovation-led growth
- Contributes to India's Net Zero by 2070 mission
- Demonstrates how energy efficiency and decarbonization can work hand in hand with economic progress

Looking Ahead

The Kolhapur Energy Management Centre is set to become a model for other states, inspiring replication across India. By fostering collaboration, empowering industries, and promoting clean technologies, it will accelerate the shift toward sustainable and resilient industrial growth.

State Energy Efficiency Index (SEEI) 2024: Driving India's Energy Transition

New Delhi | 26 August 2025 – The Ministry of Power, in collaboration with the Bureau of Energy Efficiency (BEE) and the Alliance for an Energy Efficient Economy (AEEE), released the State Energy Efficiency Index (SEEI) 2024. Now in its sixth edition, the Index assesses the energy efficiency performance of all 36 States and Union Territories for FY 2023–24.

The SEEI 2024 is built on 66 indicators across seven key sectors – buildings, industry, transport, agriculture, municipal services, DISCOMs, and cross-sector initiatives. It reflects how states are translating national energy priorities into measurable on-ground actions. At the launch, Shri Akash Tripathi, Director General, BEE, highlighted that:

“Energy efficiency is a cornerstone of India's journey toward Net Zero by 2070 and achieving a 45% reduction in emissions intensity by 2030.”

Key Highlights of SEEI 2024

- Top Performers: Maharashtra, Andhra Pradesh, Assam, and Tripura led in their respective groups.
- Front Runners: Andhra Pradesh, Karnataka, Maharashtra, Telangana, and Tamil Nadu retained their top status.
- Sectoral Progress:
 - Buildings: 24 states notified ECBC 2017

- MSMEs: 10 states adopted dedicated energy efficiency policies
- Climate Action: 25 states developed Climate/Heat Action Plans
- Transport: 31 states rolled out electric mobility policies
- Agriculture: Kerala achieved 74% adoption of solar or energy-efficient pumps

Strengthening State-Level Action

A major milestone in 2024 was that all States and UTs prepared State Energy Efficiency Action Plans (SEEAPs), with 31 forming State-Level Steering Committees to accelerate implementation.

By fostering healthy competition, providing policy guidance, and strengthening the energy efficiency ecosystem, the SEEI continues to be a critical tool in advancing India's energy transition.

Dignitaries unveiling the State Energy Efficiency Index 2024 in New Delhi.

Promoting Energy Efficiency in MSMEs: ADEETIE Workshop Held in Begusarai, Bihar

Begusarai, Bihar | September 1, 2025 — The Bureau of Energy Efficiency (BEE), under the Ministry of Power, Government of India, organized a one-day Cluster-Level Workshop under the Assistance in Deploying Energy Efficient Technologies in Industries and Establishments (ADEETIE) scheme. The event, held in collaboration with the Bihar Renewable Energy Development Agency (BREDA), aimed to promote energy efficiency and conservation among Micro, Small, and Medium Enterprises (MSMEs) in the region.

Empowering MSMEs for Energy Efficiency

The workshop focused on sensitizing industry stakeholders—particularly brick manufacturing units—about the benefits of adopting energy-efficient technologies and the financial and technical assistance available under the ADEETIE scheme.

The event was graced by the presence of Shri Saket Kumar Sinha, Under Secretary, Ministry of Power; Shri Ajay Yadav, Trainee IAS; Ms. Dnyaneshwari Kiran, General Manager, District Industries Centre (DIC), Begusarai; along with representatives from banks and financial institutions.

Government and Institutional Support

Bank officials presented various financial schemes and credit mechanisms designed to help MSMEs transition towards cleaner and more efficient production systems.

Virtually addressing the gathering, Shri Dhiraj Kumar Srivastava, Chief Engineer, and Dr. Kartik Agarwal, Deputy Secretary, Ministry of Power, urged participants to leverage opportunities under ADEETIE. They emphasized that energy efficiency not only reduces production costs but also enhances competitiveness while supporting India's transition to a greener industrial ecosystem.

MSME representatives participating in the ADEETIE Workshop in Begusarai.

Engaging Participation and Knowledge Sharing

The workshop witnessed enthusiastic participation from over 150 brick manufacturers. Attendees gained insights into modern kiln technologies, energy-efficient practices, and fuel-saving techniques that help reduce operational costs and environmental footprint. Sessions were also held on financial assistance mechanisms available under ADEETIE and other related government initiatives.

Commitment to a Greener Future

The event concluded with participants submitting Expressions of Intent (EoIs) to join the ADEETIE programme, showcasing a strong commitment among MSMEs to embrace sustainable industrial practices.

Through this workshop, BEE and BREDA reaffirmed their commitment to driving energy efficiency across Bihar's MSME sector, fostering a sustainable and inclusive industrial growth ecosystem aligned with India's vision of a low-carbon future.

Strengthening India's Carbon Market: BEE Engage Industry Leaders on Article 6.2 Implementation

New Delhi | September 2025 - The Bureau of Energy Efficiency (BEE) actively participated in a high-level Industry Interaction organized by the U.S.-India Business Council (USIBC), focusing on recent developments in India's Carbon Market and the implementation of Article 6.2 of the Paris Agreement. Ms. Nameeta Prasad, Joint Secretary, Ministry of Environment, Forest and Climate Change (MoEFCC), led the session, providing insights into the establishment and functioning of the National Designated Authority (NDA) for carbon market governance. Representing BEE, Mr. Saurabh Diddi, Director, shared perspectives on the Carbon Credit Trading Scheme (CCTS), emphasizing its critical role in supporting India's transition to a low-carbon economy and enhancing market-based mechanisms for climate action. The interaction convened a diverse group of stakeholders,

including industry leaders, professional service firms, legal experts, and technology companies. Discussions centered on the NDA's operational framework, recent regulatory developments, and the design of robust offset methodologies and compliance mechanisms, highlighting BEE's role in shaping a transparent and effective carbon market. The session reinforced the importance of strong collaboration between government agencies and industry participants to ensure a globally aligned, credible, and resilient carbon market ecosystem. BEE appreciates the proactive engagement of USIBC and industry stakeholders and remains committed to advancing India's climate goals through innovative energy efficiency and carbon market initiatives.

Experts and industry leaders discussing carbon market developments and Article 6.2.

Bureau of Energy Efficiency Observes Swachhta Pakhwada 2025

17th September – 2nd October 2025 - The Bureau of Energy Efficiency (BEE) proudly observed Swachhta Pakhwada 2025, reaffirming its commitment to cleanliness, health, and sustainable development. Guided by the principle:

"Cleanliness leads to health, health leads to prosperity, and prosperity leads to development,"

the observance highlighted the power of collective responsibility in building a cleaner, greener, and healthier India.

Swachhta Pledge Ceremony

The festivities commenced at BEE headquarters with a solemn Swachhta Pledge Ceremony. Officers and staff pledged to uphold cleanliness in their workplaces, surroundings, and communities. The ceremony underscored that cleanliness is not merely a duty, but a movement contributing to national health, dignity, and prosperity.

BEE staff taking the Swachhta Pledge at headquarters.

Essay Writing Competition: Youth Voices for Cleanliness

To encourage reflection and creativity, BEE organized an Essay Writing Competition on cleanliness and sustainability. Participants explored the role of youth in achieving the Swachh Bharat Mission, offering insightful perspectives on how individual and collective actions can drive sustainable, lasting change in society.

Tree Plantation Drive: Nurturing a Greener Future

BEE officers and staff took part in a Tree Plantation Drive under the campaigns #स्वच्छता_पखवाड़ा_2025 and #एक_पेड़_माँ_के_नाम. This symbolic initiative emphasized the link between cleanliness and environmental conservation, inspiring contributions toward a greener, balanced ecosystem.

Tree plantation drive under Swachhta Pakhwada 2025.

Walkathon: Spreading Awareness Step by Step

Adding an energetic dimension to the observance, a Walkathon saw enthusiastic participation from officers and employees. The event aimed to raise awareness about cleanliness, energy conservation, and sustainable lifestyles, motivating citizens to adopt small yet impactful habits for personal and environmental well-being.

Walkathon by BEE staff promoting cleanliness and sustainable lifestyles.

Cleanliness Drive: Leading by Example

In an on-ground effort to reinforce the message of “Swachhta hi Seva”, BEE conducted a Cleanliness Drive in and around its office premises. Officers and staff collaborated to clean their surroundings, demonstrating teamwork, dedication, and civic responsibility. The initiative highlighted the importance of maintaining clean workplaces as a reflection of organizational discipline and national pride.

Cleanliness drive conducted in and around BEE premises.

A Step Towards a Cleaner, Greener India

Through these activities, the Bureau of Energy Efficiency continues to champion cleanliness, sustainability, and environmental responsibility, in line with the Swachh Bharat Mission and India's vision for sustainable growth.

Join the Movement! Let's come together and contribute to environmental protection and a cleaner, greener India. Every small step counts!

Bureau of Energy Efficiency Celebrates Hindi Pakhwada 2025

17th – 30th September 2025

The Bureau of Energy Efficiency (BEE) celebrated Hindi Pakhwada 2025 with great enthusiasm, reaffirming its commitment to promote the use of Hindi in official communication and strengthen it as a unifying language of the nation. The observance encouraged officers and employees to incorporate Hindi more extensively in their day-to-day work, fostering linguistic pride and national integration.

Inauguration of Hindi Pakhwada 2025

The celebrations began with a call to action for all employees to actively contribute to the promotion and respect of Hindi. Officials emphasized that empowering Hindi is a crucial step toward building an Aatmanirbhar Bharat (Self-Reliant India).

English–Hindi Translation Competition

In line with promoting bilingual proficiency, an English–Hindi Translation Competition was organized during the observance. Employees actively participated, enhancing their translation skills and boosting confidence in using Hindi for administrative and technical work.

Employees participating in the English–Hindi Translation Competition.

Hindi Comment and Draft Writing Competition

Kicking off on 17th September, the Hindi Comment and Draft Writing Competition saw enthusiastic participation from officers and employees across BEE divisions. The event highlighted participants' creative writing skills and demonstrated that Hindi is an effective and precise medium for official communication.

Rajbhasha Question Forum Competition

On 22nd September, BEE conducted the Rajbhasha Question Forum Competition to raise awareness about Hindi and encourage its use in official tasks. Participants engaged enthusiastically, and winners were recognized and rewarded for their outstanding performance.

Rajbhasha Question Forum Competition during Hindi Pakhwada.

Hindi Dictation (Shrutlekhan) Competition

A key highlight of Hindi Pakhwada was the Hindi Dictation Competition, which saw officers and staff from both the Ministry of Power and BEE participating with zeal. The event underscored the dedication and commitment of employees toward promoting Hindi as the official language of governance.

Hindi Dictation Competition with participation from BEE and Ministry of Power staff.

Prize Distribution for Hindi Pakhwada Winners

30 September 2025 – The Bureau of Energy Efficiency (BEE) organized a prize distribution ceremony for the winners of various competitions held under Hindi Pakhwada. On this occasion, BEE's Director General, Mr. Dhiraj Kumar Srivastava, presented awards to the participants and encouraged them with his motivational message. The active participation of officers and staff made the event successful and meaningful.

Prize distribution ceremony for Hindi Pakhwada winners.

Message of Linguistic Pride and National Unity

Through these activities, BEE reaffirmed that Hindi not only makes official work more effective and convenient but also symbolizes national unity, cultural pride, and identity.

Let us all pledge to maximize the use of Hindi in government work, ensuring that the message of energy conservation reaches people across the country in a language that truly connects us all.

Transforming India's Climate Finance Landscape for Energy Transition and Adaptation

India stands at a decisive juncture in its pursuit of a low-carbon, climate-resilient future. As both a rising emitter and a climate-vulnerable nation, India's progress depends on the flow of adequate and equitable climate finance. At successive UNFCCC platforms, including COP29, India has reaffirmed that climate finance is not a market opportunity but a historical obligation rooted in the principle of Common But Differentiated Responsibilities and Respective Capabilities (CBDR-RC). Developed nations must mobilise at least USD 1.3 trillion annually through grants and concessional finance until 2030 to support mitigation, adaptation, and energy transition across the Global South.

India's Energy Transition

India is pursuing one of the world's most ambitious energy transitions, guided by its Panchamrit pledges and Nationally Determined Contributions (NDCs), including a 50 percent non-fossil fuel capacity by 2030 and a net-zero target by 2070. While India has made early progress, the financing challenge remains enormous. Estimates suggest that India will need USD 1.5 trillion by 2030 and up to USD 19 trillion by 2070, but current clean energy financing is only USD 13 billion per year—far short of the required USD 68 billion annually.

To close this gap, India has introduced key reforms such as issuing sovereign green bonds, developing a national climate finance

taxonomy by 2025, and instituting climate risk disclosure frameworks. These measures aim to enhance transparency, attract private investment, and de-risk green sectors, reflecting a major shift toward aligning finance with sustainable development.

Climate Finance and Justice

India's climate finance architecture is deeply intertwined with social and economic justice. The focus on a just transition ensures that decarbonisation protects workers and communities dependent on carbon-intensive industries. Despite commitments made in global forums, adaptation finance remains underfunded compared to mitigation. For India, achieving balance requires prioritising pro-poor and geographically targeted adaptation measures—resilient infrastructure, climate-smart agriculture, and decentralised renewable systems.

Urban Resilience Imperative

Urban India, the engine of growth and a hotspot of climate vulnerability, demands bold investment in resilience. The World Bank estimates that over USD 2.4 trillion will be needed for climate-resilient infrastructure by 2050, including green buildings, efficient water systems, and sustainable mobility. Climate Bonds Initiative projects a USD 1.3 trillion demand for green and sustainability-linked debt by 2030. Financing must thus shift toward resilience-building and Nature-Based Solutions, linking adaptation with mitigation.

Beyond Finance to Transformation

India's climate finance strategy is multifaceted and equity-driven, combining domestic reforms, global partnerships, and blended finance to unlock both public and private capital. However, finance alone cannot solve the climate crisis—it must lead to systemic transformation. India's vision ties climate ambition with climate justice, ensuring that financial flows serve people, ecosystems, and inclusive development. With the right mix of policies and partnerships, India can steer a pathway where energy efficiency and equity define its sustainable future.
