Small changes today lead to a better tomorrow.

Shri Milind Deora (Member of Parliament) and experts released a report at the Regional Workshop on Cooling India's Cities.

WORKSHOP ON DISTRICT COOLING FOR SUSTAINABLE URBAN DEVELOPMENT

Tabreed India, in partnership with the Bureau of Energy Efficiency (BEE) and GIZ GmbH, organized the third regional Cooling India's Cities workshop in Mumbai. Supported by the German Federal Ministry for Economic Affairs and Climate Action, the event focused on advancing District Cooling Systems (DCS) to meet Maharashtra's Net Zero 2050 goals.

Shri Milind Deora, MP, emphasized the need for scalable cooling solutions to build climate-resilient cities. Ms. Ilka Hirt, German Ministry of Environment, highlighted DCS as a key enabler for sustainable urban infrastructure.

Experts shared case studies, including Tamil Nadu's successful DCS deployment. Sudheer Perla, Tabreed Asia, noted that DCS can reduce energy demand by up to 50%, enhancing circular energy use.

The workshop concluded with calls for regulatory support, pilot projects, and public-private partnerships to integrate DCS into Maharashtra's urban planning.

Experts discussed sustainable building codes at BEE's National Workshop in New Delhi.

NATIONAL WORKSHOP ON ENERGY-EFFICIENT RETROFITS AND SUSTAINABLE BUILDING CODES

On February 28, 2025, the Bureau of Energy Efficiency (BEE), in collaboration with TERI and Pledge for Earth, successfully organized the National Workshop on Advancing Energy-Efficient Retrofits and Sustainable Building Codes at Hyatt Regency, New Delhi. The event was inaugurated by Dr. Ashok Kumar, Deputy Director General, BEE; Shri Chita Ranjan Nanda, Additional Director General, CPWD; Smt Pravatnanini Samal, Director, BEE; and Shri Sanjay Seth, Senior Director, TERI.

The workshop served as a vital platform for discussions among government agencies, policymakers, industry experts, and technical professionals on strategies to scale up energy-efficient retrofitting across India. Key sessions included training on Energy-Efficient Retrofit Manuals, offering a structured approach to improving building performance, and the introduction of the Energy Conservation and Sustainable Building Code (ECSBC) and Energy Norms for Sustainability (ENS) 2024, aimed at strengthening regulatory frameworks. The event fostered engaging discussions on implementation challenges, opportunities, and policy direction, reinforcing BEE's commitment to building a greener, more energy-efficient future.

DRIVING DECARBONIZATION IN THE CEMENT SECTOR: CMA WORKSHOP ON CARBON ABATEMENT TECHNOLOGIES

Dr. Ashok Kumar, DDG, BEE, joins experts at the CMA Workshop on Carbon Abatement in the Cement Industry.

The Cement Manufacturers' Association (CMA), in collaboration with the Bureau of Energy Efficiency (BEE), successfully organized a two-day Workshop on Carbon Abatement Technologies in the Cement Industry on March 19–20, 2025. The event was inaugurated with impactful addresses by Ms. Aparna Dutt Sharma, Secretary General, CMA; Mr. Saurabh Diddi, Director, BEE; and Dr. Neelima Alam from the Department of Science & Technology.

The workshop served as a key platform for industry leaders, policymakers, and researchers to explore innovative strategies and cutting-edge technologies to reduce carbon emissions in the cement sector. Experts from India, Japan, Germany, and Switzerland shared their experiences in energy efficiency, low-carbon technologies,

and sustainable practices, underlining the urgency of global collaboration to achieve meaningful progress in decarbonization.

Dr. Ashok Kumar, Deputy Director General, BEE, emphasized the crucial role of technological innovation and cross-sectoral cooperation in reducing the industry's carbon footprint. Discussions focused on best practices, such as alternative fuels, waste heat recovery, carbon capture and utilization (CCU), and low-carbon cement production.

The workshop reaffirmed the Indian cement sector's commitment to sustainability and energy efficiency, laying the groundwork for a transformative and climate-resilient future aligned with India's Net Zero goals.

ADEETIE SCHEME: EMPOWERING MSMEs TO DRIVE ENERGY EFFICIENCY AND INDUSTRIAL GROWTH

Hon'ble Union Minister Shri Manohar Lal engaged with stakeholders on the ADEETIE Scheme for MSME energy efficiency.

The Assistance in Deploying Energy Efficient Technologies in Industries & Establishments (ADEETIE) scheme, managed by the Bureau of Energy Efficiency (BEE), is a flagship initiative focused on enhancing energy efficiency across India's industrial landscape—particularly among Micro, Small, and Medium Enterprises (MSMEs).

On March 18, 2025, a high-level briefing meeting was chaired by the Union Minister of Power, Shri Manohar Lal, to review progress under the ADEETIE scheme. The session witnessed active participation from MSMEs, financial institutions, and industry associations, with attendees joining both in-person and virtually.

The scheme aims to support MSMEs in adopting energy-efficient technologies through interest subvention, technical handholding, and an integrated online stakeholder platform. Discussions focused on streamlining implementation and addressing stakeholder feedback to improve scheme outreach and impact.

Hon. Minister emphasized the scheme's role in strengthening the MSME sector and its alignment with India's broader industrial goals. He reiterated that enabling MSMEs to become energy-efficient not only contributes to environmental sustainability but also accelerates the nation's mission of becoming a Viksit Bharat by 2047.

This initiative reflects the government's steadfast commitment to promoting sustainable industrial practices and creating an ecosystem that balances economic growth with environmental responsibility.

The Bureau of Energy Efficiency (BEE) successfully organized a Stakeholder Consultation Workshop on Renewable Consumption Obligations (RCO) on 24th March 2025 in Goa. The event brought together key policymakers, industry leaders, and regulatory representatives to align on strategies for enhancing RCO compliance and accelerating India's transition to clean energy.

The workshop was inaugurated by esteemed dignitaries including Shri Praveen Gupta, Member (Thermal), CEA; Shri Hemant Kumar Pandey, Chief Engineer (R&R), MoP; Shri H.K. Jagadeesh, Member, KERC; Shri Milind Deore, Secretary, BEE; and Shri Pradeep Singhvi, Executive Director, Grant Thornton. It witnessed active participation from stakeholders including Designated Consumers from various industrial sectors, DISCOMs, State Electricity Regulatory Commissions (SERCs), and State Designated Agencies (SDAs).

Discussions during the workshop focused on the RCO rules and operational guidelines, along with a first look at the newly developed online RCO portal for data submission, which was demonstrated live. The portal is aimed at simplifying the compliance process. Additionally, participants engaged in insightful conversations around diverse approaches to meeting compliance requirements, emphasizing the importance of collaboration and innovation in achieving RCO targets.

This collaborative effort marks a significant step in streamlining RCO implementation and will contribute meaningfully to India's national commitment of achieving 500 GW of installed non-fossil capacity by 2030, reinforcing the country's leadership in sustainable energy transformation.

Stakeholders and Experts gather at the BEE workshop on Renewable Consumption Obligations in Goa.

Glimpses of Investment Bazaar in West Bengal, Pune, Karnataka, and Odisha - Showcasing opportunities in energy efficiency investments

With an aim to turn sustainable energy goals into real-world impact, the Bureau of Energy Efficiency (BEE), in partnership with State Designated Agencies (SDAs), organised Investment Bazaars across key states including West Bengal, Maharashtra, Karnataka, and Odisha.

These events brought together a diverse set of stakeholders — industries, ESCOs, OEMs, banks, financial institutions, Designated Consumers (DCs), energy auditors, and policy experts — all working towards a common objective: enabling financing for energy efficiency solutions.

At the heart of each Bazaar were bankable projects worth approximately INR 37.52 crore, offering clear, actionable opportunities for investment in clean and efficient energy initiatives.

So far, more than 40 such Investment Bazaars have been held across the country — each one contributing to the larger mission of making energy efficiency a financially attractive and widely adopted practice. Through this ongoing effort, BEE and SDAs continue to build momentum for a greener, more energy-conscious future.

सोशल मीडिया अभियान “24 है काफी है” के माध्यम से ऊर्जा संरक्षण का संदेश

गर्मियों में बढ़ती बिजली खपत, जलवायु परिवर्तन और बढ़ते कार्बन उत्सर्जन की चुनौतियों को देखते हुए ऊर्जा दक्षता ब्यूरो, भारत सरकार ने एक जन-जागरूकता अभियान “24 है काफी है” की शुरुआत की है। इसका उद्देश्य लोगों को BEE द्वारा प्रमाणित 5-स्टार रेटेड एसी अपनाने, AC का तापमान 24 डिग्री सेल्सियस पर बनाए रखने और 8 साल पुराने AC को बदलने लिए प्रेरित करना है, जिससे बिजली की बचत हो और पर्यावरण पर भी सकारात्मक असर पड़े।

मार्च महीने से संचालित किये जा रहे इस सोशल मीडिया अभियान में #24HaiKaafiHai और #5StarAC जैसे हैशटैग्स के माध्यम से जागरूकता फैलाई जा रही है। सोशल मीडिया इन्फ्लुएंसर्स को भी इस बारे में लोगों को जागरूक करने के लिए जोड़ा गया है। इसके अलावा प्रमुख एसी निर्माता कंपनियों, PSUs और राज्य एजेंसियां (SDAs) इसमें सक्रिय भागीदारी निभा रही हैं। साथ ही MyGov पोर्टल पर शपथ अभियान, रील प्रतियोगिता और क्विज़ जैसे इंटरैक्टिव माध्यमों द्वारा नागरिकों तक इस मुहिम को पहुंचाया जा रहा है।

ऊर्जा दक्षता ब्यूरो में राजभाषा कार्यान्वयन पर कार्यशाला आयोजित

राजभाषा विभाग के वार्षिक कार्यक्रम के अनुसार एवं राजभाषा कार्यान्वयन समिति की बैठकों में लिए गए निर्णयों के अनुपालन में, 26 मार्च 2025 को ऊर्जा दक्षता ब्यूरो में एक कार्यशाला का आयोजन किया गया। इस कार्यशाला में प्रख्यात भाषाविद् एवं लेखक डॉ. ईश्वर सिंह ने राजभाषा

कार्यान्वयन – समस्याएँ और समाधान' विषय पर व्याख्यान दिया और हिंदी भाषा के अधिकतम प्रयोग एवं उसके प्रचार-प्रसार के प्रयासों को बढ़ावा देने का आह्वान किया।
