Ro - state - mapping

Rs-map-id | Ro-id | state-id | ob | ed | ip | other

Ro - Mapping

Ro-id | Parent-id

Ro - master

add col Parent-Ro-id

UPC - Master

upc-id | Project-Name | upc-num

ro-id | agency-id.

Survey-No Table [new cols] - there to be then survey-no-also

Location-data - [varchar(max)]

cdata - [varchar-max]

Lhs-rhs - [int] 0 - LHS
1 - RHS

upc-id - int

dpa-survey-id

~~UPC~~ ~~Del~~ ~~up~~

Add ~~Main Project~~ UPC

upc-id | agency-id | Project-name | Ro-id | upc-number

[Now ~~to~~ while adding Project, Ro will ~~select~~ first select. UPC, Project will automatically come that Ro can change if needed.

DPR-Data Approved

Select UPC → select Kml file.
later API call to get Kml data.

dpr-dat-id | Ro-id | upc-id | Kml-file-name |
upload-date | Kml-data

DPR-Survey-no

Survey-id | dpr-dat-id | ~~state~~ ^{state}-id | District-id | sub-district-id |

village-id | Survey-no | total-area | area-required | Land-nature

land-type | ~~land~~ ^{land}-category | LHS-RHS | location-data |

co-data | upc-id. | more-in-main

0/1

(3)

~~data~~ After Cata login based on ~~survey~~ jurisdiction,
 System will show village-wise survey-nos from DPR.
 Survey-no [upc-id] - ~~data~~
 → Cata will ~~accept~~ survey-nos
 click on each survey-no and accept. @.

On 3a notification, all survey-nos from
 dpr-survey-no will be moved to main survey
 tables. [If not already moved - Cata with
 same jurisdiction - $\left[\begin{smallmatrix} \text{set} \\ \text{moved-in-main} = 1. \end{smallmatrix} \right]$]

~~now to where~~

Now case when cata makes any change
 in survey-no. - new entry will be made in a
table Survey-changed

Changed-id | Project-id | upc-id | cata-id | Survey-id | dpr-survey-id
 changed-on | new-Kml | new-Kml-date | change-reason
 0/1

* Whenever cata makes changes in survey-no he has
 to enter reason for change.

: upload

Project Status by Ro

~~select~~
in this we'll just upload Kml and
will not store any data.

will just display data directly from Kml.

3 4 | 3D | 3G | 3H | Mutation | Road | state | District.

we'll generate Kml with cdata. as per
part. - ~~30~~

Potato-id | upc-id | Project-id | Kml-file-name | Kml-date.
|
Bhumi Rishi

Question -

~~Folder name~~ Ro

Should we keep Kml in
Folder as well?

I suggest after each notification/stage
generate Kml-file.

Also every-day for Road | state | District and Ro.
